FOREWORD

Coal, a fossil fuel, is the largest source of energy, primarily used to produce electricity and heat through combustion. Coal gasification can be used to produce syngas, which can be further transformed into transportation fuel like gasoline and diesel. Coal can also be directly liquefied into diesel through highly sophisticated techniques. Coal liquefaction is one of the backstop technologies that could potentially limit escalation of oil prices and also coal will have a key role to discharge in the global energy mix.

The goal of coal mining is to economically remove coal from the ground. In a developing country like India, growth in energy consumption is entwined with the economic growth. Coal, being a relatively cheap energy resource in contrast to a very low hydrocarbon resource potential, remains the focus of attention of the energy planners ever since the oil crunch of the early seventies. For making a strategic coal sector plan for the country on a continuing basis, a sound data base is essential.

Coal controller's Organisation has been carrying out for the past several years the task of collection and dissemination of data related to the coal and lignite sector of the country to meet data requirement of the Ministry of Coal, related Ministries and Government Organisations, different research bodies, planners, thinkers etc. through its publications namely 'The Coal Directory of India' and 'Provisional Coal Statistics'. Coal Directory of India provides Coal and Lignite Statistics spreading over eleven sections covering some general economy data, brief history of coal sector in India, present status, reserve, production, dispatches, pit head closing stock, price, export and import, trends of coal consumption in power, steel and cement production, captive coal and lignite blocks, world coal statistics and brief colliery statistics.

The data presented in this Directory have been collected from different coal/lignite companies through a format designed by the Coal Controller's Organisation. We are grateful to different data supply agencies viz., all CIL Subsidiaries, SCCL and other coal companies, SAIL Units, Geological Survey of India (GSI), Directorate General of Commercial Intelligence Statistics (DGCI&S), Central Statistics Office (CSO), Central Electricity Authority (CEA), Cement Manufacturer's Association and International Energy Agency (IEA) for providing useful information so as to make the **Coal Directory of India 2016-17** an exhaustive data-base related to coal & lignite.

The maintenance of relevant data, subsequent validation and updating and preparation of tables in a more presentable and concise form have been carried out by the Statistics Wing of the Coal Controller's Organisation.

Suggestions for further improvement are most welcome.

Kolkata :

Section I

A. Historical Perspective

1.1 Coal Sector in India

1.1.1 Commercial use of coal in India is said to have started about two thousand years ago at places close to coal regions in the eastern part of the country. In 1774, Summer & Heatley applied to M/s. East India Company to raise coal in Raniganj coalfield along the Western Bank of river Damodar. However, coal mining did not receive adequate attention due to its inferior quality as compared to the quality of coal in UK. For some time, coal mining activities in India were at low ebb. However, coal mining received a thrust with the setting up of a rail link between Howrah and Raniganj in 1853.

1.1.2 The monopoly of M/s. East India Company was abolished in 1813 and this paved way for rapid inroad of private commercial organizations in coal sector too. In 1843, M/s. Bengal Coal Company Limited was registered as a first joint stock company. Steam engines were introduced during this period and demand of coal continued to grow.

1.1.3 Since 1920, a number of commissions & committees made observations on the question of conservation and winning of coal, safety of mines etc. which led to introduction of regulations and controls of the coal industry, in some form or other, in India. All the regulations and controls were directed towards state ownership of the coal mines in the country. Singareni Collieries Company Limited (SCCL) established in 1920 as a public limited company, has the distinction of being the first Government owned Coal Company in the country in 1945. In fact, in 1945, Nizam of Hyderabad bought majority of the shares of the company and brought the company under

the State of Hyderabad. From 1945 to 1949, the Hyderabad Construction Company Limited worked as Managing Agent of SCCL. In 1949 this function was entrusted to Industrial Trust Fund by the then Government of Hyderabad. Pursuant to the reorganization of States in 1956, the controlling interest of the company devolved on the Government of Andhra Pradesh. Thus, SCCL became a Government Company under the Companies Act in 1956. SCCL is now a joint undertaking of Government of Andhra Pradesh and Government of India sharing its equity in 51:49 ratio.

1.1.4 In 1956, National Coal Development Corporation (NCDC) came into existence as a Government of India Undertaking with the collieries owned by the railways as its nucleus. During the sixties, the coal industry passed through a period of cheap availability of oil. The situation, however, took a radical turn in the seventies due to spiraling up of oil prices resulting in hike in coal demand.

1.2 Nationalisation of Coal Mines.

1.2.1 Coal mines in India were nationalised in 1972-73 with the objectives of reorganising and restructuring of coal mines in the back drop of the then existing unsatisfactory mining conditions, violation of mine safety norms, industrial unrest, inadequate capital investments in mine development, reluctance to mechanise the mining, etc. It also aimed at meeting the long range coal requirements of the country.

1.2.2 The nationalisation was done in two phases, the first with the nationalization of the coking coal mines in 1971-72 and then with the nationalization of the non-coking coal mines in 1973. The Coking Coal Mines

(Emergency Provisions) Ordinance was promulgated by the Government of India on 16.10.1971 under which except the captive mines of TISCO and IISCO, the management of all coking coal mines was taken over by the Government. A new company called Bharat Coking Coal Limited was formed as a subsidiary company of Steel Authority of India Limited to manage the taken over mines. These mines were subsequently nationalised w.e.f. 1.5.1972. Later on the management of 711 non-coking coal mines was also taken over by the Government with effect from 31.1.1973 and they were nationalised w.e.f. 1.5.1973 and a new Government Company namely, Coal Mines Authority Limited (CMAL) with headquarters at Calcutta, was set up by the Government in May, 1973 to manage the non-coking coal mines. The CMAL was organised as a unitary structure on divisional pattern with four Divisions, the Central Division, the Eastern Division, the Western Division and the CMPDIL. The mines of erstwhile National Coal Development Corporation were brought under the Central Division of the CMAL. In September, 1975 Coal India Limited (CIL) was formed as a Holding Company with five subsidiaries namely Bharat Coking Coal Limited (BCCL), Central Coalfields Limited (CCL), Eastern Coalfields Limited (ECL), Western Coalfields Limited (WCL) and Central Mine Planning and Design Institute Limited (CMPDIL).

1.2.3 In view of the projected increase in production and investment contemplated for CCL and WCL group of coal mines and in view of their extensive geographical spread resulting in day to day administrative, technical and communication problems etc. two more coal companies, namely, Northern Coalfields Limited (NCL) with headquarters at Singrauli (Madhya Pradesh) and South Eastern Coalfields Limited (SECL) with headquarters at Bilaspur (Chhattisgarh) were formed w.e.f. 28.11.1985.

1.2.4 Considering the prospects of Orissa Coalfields, being the growth centre for the VIII and IX Plan periods, a new coal company was formed bifurcating South Eastern Coalfields Limited (SECL). The new company, Mahanadi Coalfields Limited (MCL) was incorporated on 3rd April, 1992 with its headquarters at Sambalpur (Orissa) as fully owned subsidiary of Coal India Limited to manage the Talcher and IB-Valley Coalfields in Orissa.

1.2.5 CIL have now 8 subsidiaries viz. Bharat Coking Coal Limited (BCCL), Central Coalfields Limited (CCL), Eastern Coalfields Limited (ECL), Western Coalfields Limited (WCL), South Eastern Coalfields Limited (SECL), Northern Coalfields Limited (NCL), Mahanadi Coalfields Limited (MCL) and Central Mine Planning and Design Institute Limited (CMPDIL). The CMPDIL is an engineering, design and exploration company set up for preparing perspective plan(s), rendering consultancy services and undertaking exploration and drilling work to establish coal reserves in the country and collection of detailed data for preparation of projects for actual mining. The other seven subsidiaries of CIL are coal producing companies.

1.2.6 CIL and its subsidiaries are incorporated under the Companies Act, 1956 and are wholly owned by the Central Government. The coal mines in Assam and its neighbouring areas are controlled directly by CIL under the unit North Eastern Coalfields.

1.3 Captive Coal Mining

1.3.1 Coal Mines (Nationalisation) Act, 1973 already excluded from its purview the captive coal mines of TISCO, IISCO & DVC. Further, considering the need to provide boost to thermal power generation and for creating additional thermal power capacity during VIIIth Five year Plan, the Government decided to allow private participation in the power sector. The Coal Mines

(Nationalisation) Act, 1973 was amended on 9th June 1993 to allow coal mining by both private and public sectors for captive consumption for production of iron and steel, generation of power, washing of coal obtained from a mine and other end use, which would be notified by the Government from time to time. While cement production was allowed as an end use on w.e.f 05.03.1996, latest amendment on 12.07.2007 made production of Syn-gas obtained from coal gasification and coal liquefaction also as an end use. The restriction of captive mining does not apply to state-owned coal/mineral development undertakings like CIL, SCCL, Neyveli Lignite Corporation (NLC) coal blocks etc. and Mineral Development Corporations of the State Governments.

1.3.2 Till date coal mining is kept under the purview of public sector except captive mining for the approved end use industries viz., iron and steel, power, cement, washing of coal and coal gasification and liquefaction. Role and contribution of private sector captive coal mining, which has been very insignificant till recent past, has now acquired significance. Government further decided in its new mining policy to allow the State Government companies and undertakings to go for coal and lignite mining without the earlier restriction of isolated small pockets only.

1.3.3 The policy of the allotment of Captive Coal Blocks was adopted by the Government of India in the year 1993 and as per this policy by the end of 2013-14, out of total allocated of 218 coal blocks, 87 coal blocks were de-allocated due to non-performance and 7 blocks have been reallocated resulting 138 coal blocks and 28 lignite blocks remained allocated under the category of Captive Coal Block by the end of 2013-14. During the year 2014-15 by virtue of judgment dated 25.08.2014 read with the order dated **24.09.2014 of the Hon'ble Supreme Court of India**, out of 218 captive coal blocks, allocation of 204 coal blocks

were cancelled except allocation of 12 coal blocks for UMPPs and one coal block each allocated to NTPC and SAIL (i.e. a total of 14 Blocks).

Further, allocation of four(4) coal blocks for UMPPs, namely, Chhatrasal coal block cancelled on 07.05.2015 and Meenakshi, Meenakshi B and Dip side of Meenakshi blocks of UMPP cancelled on 15.12.2015. As such as on date 10 coal blocks allocated through earlier dispensations stand allocated.

1.3.4 Subsequent to the order of the **Hon'ble Supreme Court of India, 42 nos. of** producing coal blocks [Schedule II coal mines as per the Coal Mines (Special Provisions) Ordinance, 2014 replaced by the Coal Mines (Special Provision) Act, 2015 were allowed to produce coal up to 31.03.2015. Thus total number of blocks stand allocated from 25.09.2014 to 31.03.2015 was 52 [42 + 10 earlier coal blocks].

As per Coal Mines (Special Provisions) Act, 2015, allocation of Schedule-I coal mines started by way of Public Auction or on the basis of Competitive Bids for Tariff. Up to 31.03.2017 re-allocation (either vested, allotted or custodian) were done in respect of 84 coal blocks. 10 blocks started production, 3 more coal blocks have been given to Coal India Limited had started production. Moher & Moher Amlori was already continuing production. Pakri-Barwadi of NTPC which was also not cancelled, started production. In 2016-17, production from those Captive Coal Blocks was 37.434 MT.

Under the "Auction by Competitive Bidding Rules, 2012", 13 regionally explored coal blocks have been allotted to Central/State Government companies up to 31.03.2017.

Therefore, as on 31.03.2017, numbers of coal blocks stand exist as 107 (vested/allotted -77 + Custodian – 07 + Under Auction by Competitive Bidding Rules,

2012 – 13 and blocks allocated through earlier dispensations – 10).

1.4 Distribution and Marketing of Coal

1.4.1 A new coal distribution policy (NCDP) has been notified on 18.10.2007 with an objective to meet the demand of coal from consumers of different sectors of the economy, both on short and long term basis, in an assured, sustained, transparent and efficient manner with built-in commercial discipline. Apart from meeting the requirement up to a satisfactory level through commercially enforceable Fuel Supply Agreement (FSA), it also provides for dedicated source of supply through State Government nominated agencies, for consumers in small and medium sector, whose annual requirement does not exceed 4200 metric tonnes. E-auction scheme has also been introduced to cater to some demands through e-auction.

1.4.2 Salient features of the New Coal Distribution Policy:

1. Existing classification of core and non-core sector is dispensed with. Each sector/ consumers would be treated on merit keeping in view regulatory provision applicable thereto and coal will be supplied by CIL/SCCL through Fuel Supply agreement (FSA), a legally enforceable buyer-seller coal supply agreements.
2. Requirement of Defence and Railways will be made in full at notified price.
3. While for Power (utilities), including Independent Power Producers/ CPP and Fertiliser Sector, 100% of normative requirement of coal at notified price will be supplied, for other consumers this will be 75%.
4. Supply of coal to steel plants would be based on FSA and pricing would be on import parity pricing.
5. Consumers in small and medium sector, requiring coal less than 4200 tonnes

annually will take coal either from state govt. notified agencies/NCCF//NSIC or from CIL/SCCL through FSA. CIL/SCCL will supply coal to the nominated agencies for such distribution.

6. Linkage system will be replaced by FSA.
7. New consumers of Power (U) /IPP/CPP/ Fertilizers/ Cement/ DRI plant will be issued Letter of Assurance (LOA), with a validity of 24 months, subject to prevailing norm, recommendation of concerned Ministry and 5% Earnest money deposit. On necessary progress of the plants, consumer may approach to CIL/SCCL for converting LOA into FSA.
8. Existing Standing Linkage Committee would continue to recommend LOA in respect of Power (U)/ IPP /CPP, Cement and Sponge Iron Plants including Steel.

1.5 Import of Coal

1.5.1 Present import policy allows coal to be freely imported under Open General License by the consumers themselves considering their needs. Coking coal is imported by Steel sector and coke manufacturers mainly on availability and quality consideration. Coast based power stations and cement plants are also importing non-coking coal on consideration of transport logistics, commercial prudence. In spite of hardening prices of both coking and non-coking coal internationally and increase in ocean freight, large amount of coal continued to be imported.

1.6 Notified Price of Coal

1.6.1 Under the Colliery Control Order, 1945, the Central Government was empowered to fix the prices of coal grade-wise and colliery-wise. As per recommendations of Bureau of Industrial Costs and Prices and the Committee on Integrated Coal Policy, prices of different grades of coal had been subjected to deregulation since 22.3.96, in a phased manner. The pricing of coal has been fully

deregulated after the notification of the Colliery Control Order, 2000 in place of

Colliery Control Order, 1945.

B. Concepts, Definitions and Practices

1.7 Coal: Coal is a combustible sedimentary rock formed from ancient vegetation which has been consolidated between other rock strata and transformed by the combined effects of microbial action, pressure and heat over a considerable time period. This process is commonly called 'coalification'. Coal occurs as layers or seams, ranging in thickness from millimeters to many tens of metres. It is composed mostly of carbon (50–98 per cent), hydrogen (3–13 per cent) and oxygen, and smaller amounts of nitrogen, Sulphur and other elements. It also contains water and particles of other inorganic matter. When burnt, coal releases energy as heat which has a variety of uses.

1.8 Classification of Coal

1.8.1 Coal refers to a whole range of combustible sedimentary rock materials spanning a continuous quality scale. For convenience, this continuous series is often divided into two main categories, namely **Hard Coal** and **Brown Coal**. These are further divided into two subcategories as given below.

- **Hard Coal**

- Anthracite
- Bituminous coal
- Coking coal
- Other bituminous coal

- **Brown coal**

- Sub-bituminous coal
- Lignite

1.8.2 In practice, hard coal is calculated as the sum of anthracite and bituminous coals. Anthracite is a high-rank, hard coal used mainly for industrial and residential heat raising. Bituminous coal is a medium-rank coal used for gasification, industrial coking

and heat raising and residential heat raising. Bituminous coal that can be used in the production of a coke capable of supporting a blast furnace charge is known as **coking coal**. Other bituminous coal, not included under coking coal, is also commonly known as **thermal coal**. This also includes recovered slurries, middling and other low-grade, higher-rank coal products not further classified by type.

1.8.3 Classifying different types of coal into practical categories for use at an international level is difficult because divisions between coal categories vary between classification systems, both national and international, based on calorific value, volatile matter content, fixed carbon content, caking and coking properties, or some combination of two or more of these criteria.

1.8.4 Although the relative value of the coals within a particular category depends on the degree of dilution by moisture and ash and contamination by sulphur, chlorine, phosphorous and certain trace elements, these factors do not affect the divisions between categories.

1.8.5 The International Coal Classification of the Economic Commission for Europe (UNECE) recognizes two broad categories of coal:

- i) **Hard coal** – Coal of gross calorific value not less than 5700 kcal/kg (23.9 GJ/t) on an ash-free but moist basis and with a mean random reflectance of vitrinite of at least 0.6.
- ii) **Brown coal** - Non-agglomerating coal with a gross calorific value less than 5700 kcal/kg (23.9 GJ/t) containing more than 31% volatile matter on a dry mineral matter free basis.

1.8.6 It should be stressed that the above classification system is based on the inherent qualities of the coal in question and not on the final use of the coal. In this way the classification system attempts to be objective and simple to apply.

1.9 Classification of Coal in India

1.9.1 In India coal is broadly classified into two types – Coking and Non-Coking. The former constitute only a small part of the total coal resources of the country. These two are further subdivided as follows on the basis of certain physical and chemical parameter as per the requirement of the industry.

1.9.2 **Coking Coal:** Coking coal, when heated in the absence of air, form coherent beads, free from volatiles, with strong and porous mass, called coke. Coking coal has coking properties and is mainly used in steel making and metallurgical industries.

1.9.3 **Semi Coking Coal:** Semi Coking Coal, when heated in the absence of air, form coherent beads not strong enough to be directly fed into the blast furnace. Such coal is blended with coking coal in adequate proportion to make coke. Clearly, Semi Coking Coal has comparatively less coking properties than coking coal. It is mainly used as blendable coal in steel making, merchant coke manufacturing and other metallurgical industries.

1.9.4 **Non-Coking Coal:** Non-Coking Coal does not have coking properties and is mainly used for power generation. It is also used for cement, fertilizer, glass, ceramic, paper, chemical and brick manufacturing, and for other heating purposes.

1.9.5 **Washed Coal:** Processing of coal through water separation mechanism to improve the quality of coal by removing denser material (rocks) and high ash produces washed coal which has less ash, higher moisture, better sizing, better consistency, less abrasive, etc. The washed coking coal is used in manufacturing of hard coke for steel making. Washed non-coking coal is used mainly for power generation but

is also used by cement, sponge iron and other industrial plants.

1.9.6 **Middlings and Rejects:** In the process of coal washing, apart from Clean Coal we also get two by-products, namely, Middlings and Rejects. Clean coal has low density whereas rejects have high density. Middlings have intermediate density. Rejects contain high ash, mineral impurities, fraction of raw coal feed, etc. and are used for Fluidized Bed Combustion (FBC) Boilers for power generation, road repairs, briquette (domestic fuel) making, land filling, etc. Middlings are fraction of raw coal feed having values of classificatory parameters between that of clean coals and rejects. It is used for power generation. It is also used by domestic fuel plants, brick manufacturing units, cement plants, industrial plants, etc.

1.9.7 **Hard Coke:** Solid product obtained from carbonisation of coal, used mainly in the iron & steel industry.

1.10 Categorisation of Coal in India

1.10.1 In India, **coking coal** has been categorized or graded on the basis of ash content as per following scheme:

Grade	Ash Content
Steel Gr I	Ash content < 15%
Steel Gr II	15% <= Ash content < 18%
Washery Gr I	18% <= Ash content < 21%
Washery Gr. II	21% <= Ash content < 24%
Washery Gr. III	24% <= Ash content < 28%
Washery Gr. IV	28% <= Ash content < 35%

1.10.2 In India, **semi coking coal** has been categorized or graded on the basis of ash and moisture content as per following scheme:

Grade	Ash + Moisture content
Semi coking Gr. I	less than 19%
Semi coking Gr. II	Between 19% and 24%

1.10.3 In India, **non-coking coal** had been categorized or graded on the basis of Useful Heat Value (UHV) as per following scheme:

Grade	Useful Heat Value
A	UHV.> 6200 kCal/Kg
B	6200 >=UHV(KCal/Kg)>5600
C	5600 >=UHV(KCal/Kg)>4940
D	4940 >=UHV(KCal/Kg)>4200
E	4200 >=UHV(KCal/Kg)>3360
F	3360 >=UHV(KCal/Kg)>2400
G	2400 >=UHV(KCal/Kg)>1300

N.B:

1. "Useful heat value" is defined as:

$$UHV = 8900 - 138 (A + M)$$

Where UHV = Useful heat value in kCal/kg,

A = Ash content (%),

M = Moisture content (%).

2. In the case of coal having moisture less than 2 percent and volatile content less than 19 percent the useful heat value shall be the value arrived as above reduced by 150 kilo calories per kilogram for each 1 percent reduction in volatile content below 19 percent fraction pro-rata.

3. Both moisture and ash is determined after equilibrating at 60 percent relative humidity and 40 degree C temperature.

4. Ash percentage of coking coals and hard coke shall be determined after air drying as per IS1350 -1959. If the moisture so determined is more than 2 per cent, the determination shall be after equilibrating at 60 percent relative humidity at 40 degree C temperature as per IS : 1350 - 1959.

1.10.4 In order to adopt the best international practices, India decided to switch over from the grading based on

Useful Heat Value (UHV) to the grading based on Gross Calorific Value (GCV) and therefore on 16.01.2011 the Ministry of Coal notified the switch over. As per the new system, following nomenclature has been introduced for gradation of **non-coking coal**.

Grades	GCV Range (Kcal/Kg)
G1	GCV exceeding 7000
G2	GCV between 6701 & 7000
G3	GCV between 6401 & 6700
G4	GCV between 6101 & 6400
G5	GCV between 5801 & 6100
G6	GCV between 5501 & 5800
G7	GCV between 5201 & 5500
G8	GCV between 4901 & 5200
G9	GCV between 4601 & 4900
G10	GCV between 4301 & 4600
G11	GCV between 4001 & 4300
G12	GCV between 3700 & 4000
G13	GCV between 3400 & 3700
G14	GCV between 3101 & 3400
G15	GCV between 2801 & 3100
G16	GCV between 2501 & 2800
G17	GCV between 2201 & 2500

1.10.5 Based on the GCV ranges of proposed gradation and erstwhile gradation, a concordance table is generated for better understanding. However, it may be noted

that this concordance does not depict exact one-to-one relation between the two systems.

Table 5: Concordance Table	
Old Grading based on UHV	New Grading based on GCV
A	G1
	G2
	G3
B	G4
	G5
C	G6
D	G7

E	G9
	G10
F	G11
	G12
G	G13
	G14
Non-coking Coal Ungraded	G15
	G16
	G17

1.11 Some General Concepts

1.11.1 Run-of-mine (ROM) coal: The coal delivered from the mine to the Coal Preparation Plant (CPP) is called run-of-mine (ROM) coal. This is the raw material for the CPP and consists of coal, rocks, middlings, minerals and contamination. Contamination is usually introduced by the mining process and may include machine parts, used consumables and parts of ground engaging tools. ROM coal can have a large variability of moisture and particle size.

1.11.2 Opencast Mining: Open-pit mining, open-cut mining or opencast mining is a surface mining technique of extracting rock or minerals from the earth by their removal from an open pit or borrow. This form of mining differs from extractive methods that

require tunneling into the earth such as long wall mining. Open-pit mines are used when deposits of commercially useful minerals or rock are found near the surface; that is, where the overburden(surface material covering the valuable deposit) is relatively thin or the material of interest is structurally unsuitable for tunneling (as would be the case for sand, cinder, and gravel). For minerals that occur deep below the surface - where the overburden is thick or the mineral occurs as veins in hard rock - underground mining methods extract the valued material.

1.11.3 Underground Mining of Coal: It refers to a group of underground mining techniques such as Longwall Mining, Room-And-Pillar Mining, etc. used to extract coal from sedimentary ("soft") rocks in which the overlying rock is left in place, and the mineral(coal) is removed through shafts or tunnels.

1.11.4 Stripping Ratio : In mining, stripping ratio or strip ratio refers to the ratio of the volume of overburden (waste materials) required to be handled in order to extract some tonnage of coal. For example, a 3:1 stripping ratio means that mining one tonne of coal will require mining three tonnes of waste materials. This is a phenomenon related to mainly Opencast (OC) mining which requires removal of overburden prior to extraction of coal. Underground mining operations tend to have lower stripping ratio due to increased selectivity.

1.11.5 Output per Man Shift (OMS) : Productivity means ratio between input and output and can be interpreted in different ways by different people. To some people, it is output per man shift (OMS). To the production people, it is actual return from plants, machineries of productivity of machineries.

1.11.6 Despatch and Off-take: The term "Despatch" (say, of raw coal) is used in this compilation to mean all the despatch of coal to different sectors but exclude collieries' own consumption (boiler coal used in collieries and supply to employees). On

the other hand "Off-take" means total quantity of raw coal used/ lifted for consumption and naturally includes collieries own consumption. Therefore,

Off-take = Despatch + Colliery Consumption

1.11.7 **Change of Stock:** Change of Stock means the difference between opening and closing stock of an item.

1.11.8 **Pit-Head Stock:** The term "Pit-head Closing Stock" of raw coal is used in this compilation to mean all the raw coal stock at pit- head of collieries.

1.11.9 **Pit-head Value:** Pit-head Value of coal is the value of coal at pit-head of the colliery. It is computed on the basis of base price and therefore it does not involve any cost of loading, transportation from pit-head, Cess, Royalty, Sales tax, Stowing Excise Duty etc. This approach is followed by all non-captive coal companies, viz., CIL Subsidiaries, The Singareni Collieries Companies Ltd. (SCCL), Jharkhand State Mineral Development Corporation Ltd. (JSMDCL) and Jammu & Kashmir Mineral Ltd. (JKML).

1.11.9.1 In case of captive collieries, pit-head value of coal depends upon their accounting policy. If the costing of coal is done on no-profit-no-loss basis then pit-head value is calculated accordingly. This practice is found to be followed in captive collieries of public sector units.

1.11.9.2 On the other hand, if the captive colliery is treated as independent commercial unit then pit-head value is calculated on the basis of unit value of realisation, which includes cost price and profit/loss per unit but excludes any transportation cost from pit-head, Cess, Royalty, Sales tax, Stowing Excise Duty etc. This is particularly followed in private captive colliery which is in contract to supply coal to any priority sector for which captive colliery is permitted (Steel, Iron, Power, Cement, etc.).

1.11.9.3 Even there are private sector collieries being managed by the parent company engaged in manufacturing of Steel and Iron, Power, Cement for which captive collieries are allowed. Due to non-availability of value figures from these companies, pit-head value of coal is determined on the basis of nearest Coal India Subsidiary price rate considering comparable grade and location. Though this may not be a correct price and would not depict a true picture, yet we use it because this is one of the acceptable estimates.

1.11.9.4 While using value data it is to be kept in mind that these data are useful for macro-level study or trend study. However, the quality of coal has been deteriorating over the years, quite inversely proportional to the open cast production share in the total production. Thus the comparison of unit value over the years would not reflect correct picture of inflation until this deteriorating effect of quality is not considered and that effect is removed.

1.11.9.5 It may be concluded that, in India, unit value (Rs.) of coal in terms per kilo calorie useful heat value has been increasing more rapidly than being exhibited by simple unit value comparison over the years.

1.12 Commodity Classification

1.12.1 For export import data, the 8-digit codes of Indian Trade Classification (based on Harmonised Coding System) have been adopted by DGCI&S in classifying the various grades of coal and coal products. For Coking coal the only 8-digit code is **"27011910"** and all other codes of coal are taken as non-coking coal (Mainly pertains to remaining part of 2701, some parts of 2702 & 2703). Similarly for all items in 2704 group has been taken under coke. The effect of retort carbon is negligible and included under coke.

Highlights

(A) Production

In the year 2016-17, the total production of raw coal in India was 657.868 MT whereas it was 639.230 MT in 2015-16. Thus in 2016-17, production of coal increased by 2.9% over 2015-16. In the year 2016-17, production of lignite was 45.230 MT against 43.842 MT in 2015-16, thus in 2016-17 production increased by 3.2% over 2015-16. [Ref : table 3.1]

1. The contribution of public sector and private sector in the production of Raw Coal in 2016-17 was as follows: [Ref : table 3.8]

Production of Raw Coal in 2016-17 (MT)			
Sector	Coking	Non Coking	Total Coal
Public	55.345	569.851	625.196
Private	6.316	26.356	32.672
All India	61.661	596.207	657.868

2. The production of coking coal in 2016-17 was 61.661 MT whereas it was 60.887 MT in 2015-16, thus 1.27% growth over 2015-16. In 2016-17, the production of non-coking coal was 596.207 MT whereas it was 578.343 MT in 2015-16, thus 3.09% growth over 2015-16. [Ref Table: 3.8].
3. In 2016-17, the production of washed coal (coking) was 6.414 MT compared to 6.182 MT in 2015-16, thus increased by 3.8% over 2015-16. In 2016-17, production of middling (coking) was 4.598 MT whereas in 2015-16 it was 5.525 MT, thus decreased by 16.8% over 2015-16. [Ref Table: 3.3]
4. In 2016-17, Odisha registered highest coal production of 139.359 MT (21.2%) followed by Chhattisgarh 138.525 MT (21.1%), Jharkhand 126.435 MT (19.2%) and Madhya Pradesh 105.013 MT (16.0%). In 2016-17, Tamil Nadu was the largest producer of lignite and produced 26.204 MT (57.9%) followed by Gujarat 10.546 MT (23.3%) and Rajasthan 8.480 MT (18.7%). [Ref Table: 3.6 & 3.7]
5. Coal India Limited produced 554.140 MT (84.2%) and SCCL 61.336 MT (9.3%) of coal in 2016-17. In that year main producer of lignite was Neyveli Lignite Corporation and produced 27.617 MT (61.1%). [Ref Table: 3.8]
6. Like previous years in 2016-17, Jharkhand produced the maximum coking coal in India, 59.604 MT which was 96.7% of total coking coal production (61.661 MT). As the highest non-coking coal producing state, Odisha produced 139.359 MT (23.4 %) followed by Chhattisgarh 138.415 MT (23.2%) and Madhya Pradesh 104.882 (17.6%). [Ref Table: 3.9]
7. In 2016-17, around 93.3% of coal production in India was from opencast mines (613.518 MT) and the rest 6.7% was from underground mines (44.350 MT). [Ref Table:-3.16]. SECL produced highest

- quantity of coal from underground mines, 14.548 MT (32.8%) followed by SCCL which produced 9.515 MT (21.5%). [Ref Table: 3.17]
8. Overall stripping ratio for the year 2016-17 was 2.65 (stripping ratio is defined as the ratio of overburden removal to coal produced in open cast mining.) [Ref table 3.19]
 9. Productivity (OMS) of opencast mines in 2016-17 was 15.0 Tonnes for CIL and 13.85 Tonnes for SCCL. OMS for underground mines of CIL was 0.80 Tonnes and for SCCL was 1.18 Tonnes.(OMS is the output measured in tonnes per unit of man-shift) [Ref table: 3.20].

(B) Despatch

1. In the year 2016-17, despatch of indigenous raw coal was 645.978 MT against 632.442 MT in 2015-16, increased by 2.14% over 2015-16. In 2016-17, despatch of lignite was 43.155 MT against 42.211 MT in 2015-16, increased by 2.2% over 2015-16. [Ref table : 4.1]
2. The contribution of public sector and private sector in the dispatch of raw coal in 2016-17 was as follows: [Ref table : 4.8]

Despatch of Raw Coal in 2016-17 (MT)			
Sector	Coking	Non-coking	Total Coal
Public	52.997	560.401	613.398
Private	6.311	26.269	32.580
All India	59.308	586.670	645.978

3. Despatch of coking coal marginally increased to 59.308 MT in 2016-17 from 59.213 MT in 2015-16. [Ref: Table 4.8].
4. In 2016-17, despatch of non-coking coal was 586.670 MT whereas it was 573.229 MT in 2015-16, thus increased by 2.34% over 2015-16. [Ref table : 4.8]
5. In 2016-17, despatch of washed coal (coking) was 6.515 MT against 6.068 MT in 2015-16, increased by 7.4% over 2015-16. Whereas in 2016-17, despatch of middling (coking) was 4.525 MT against 5.735 MT in 2015-16, decreased by 21.1% over 2015-16. [Ref table : 4.3]
6. In 2016-17, major quantity of coal was despatched from Odisha 143.287 MT (22.2%) followed by Chhattisgarh 135.268 MT (20.9%), Jharkhand 120.739 MT (18.7%), Madhya Pradesh 87.743 MT (13.6%) and Telangana 60.791 MT (9.4%). [Ref table : 4.6]
7. In case of lignite despatch, Tamil Nadu had the highest share of 24.165 MT (53.0%) followed by Gujarat 10.545 MT (24.4%) and Rajasthan 8.445 MT (19.6%). [Ref table : 4.7]
8. Out of the total despatch of raw coal in 2016-17, despatch of CIL was 542.981 MT (84.1%) and SCCL 60.791 MT (9.4%). Among the other PSUs maximum coal was despatched by RRVUNL 8.267 MT. Despatch of coal from private sector was 32.580 MT in which SPL had the largest share of 17.101 MT followed by TISCO of 6.311 MT. [Ref table : 4.8]
9. Power Sector (Utility) continued to be the largest user of coal. In 2016-17, coal despatched to power sector was 489.571 MT (76.0%) compared to 483.124 MT (76.4%) in 2015-16. Coal despatched to steel sector was 10.131 MT in 2016-17 and 12.273 MT in 2015-16. Coal despatched to cement sector was 6.356 MT in 2016-17 compared to 8.985 MT in 2015-16 [Ref table : 4.18]
10. In 2016-17, out of total despatch (external) of raw coal, despatch by rail (external) was 326.607 MT (53.5%) and by road (external) 171.746 MT (28.1%). [Ref table : 4.15]

(C) Pit Head Closing Stock

1. Pit-head closing stock of raw coal at the end of 2016-17 was 76.889 MT against 65.361 MT at the end of 2015-16. Closing Stock of lignite at the end of 2016-17 was 6.883 MT whereas it was 4.809 MT at the end of 2015-16. [Ref table : 5.1]. Out of total closing stock at the end of 2016-17, share of public sector was 76.215 MT. [Ref table: 5.6]
2. At the end of 2016-17, Pit-head closing stock of coking coal was 11.165 against MT 8.724 MT at the end of 2015-16 and pit-head closing stock of non-coking coal was 65.724 MT at the end of 2016-17 against MT 56.637 MT at the end of 2015-16 [Ref table :5.2].

(D) Import and Export

1. In 2016-17, total import of coal was 190.953 MT compared to 203.949 MT in 2015-16, a decrease of 6.37% over 2015-16. In 2016-17, import of coking coal was 41.644 MT compared to 44.561 MT in 2015-16, a decrease of 6.55% over 2015-16. Import of non-coking coal was 149.309 MT in 2016-17 compared to 159.388 MT in 2015-16-15, a decrease of 6.32% over 2015-16. [Ref table : 7.1]
2. In 2016-17, coal was mainly imported from Indonesia (91.261 MT), Australia (46.654 MT), South Africa (33.980 MT), USA (5.097 MT), Russia (4.200 MT) and Mozambique (3.707 MT) [Ref table : 7.3]
3. In 2016-17, coal was mainly imported through Krishnapatnam (16.210 MT), Paradip Sea (15.998 MT), Sez Mundra (15.855 MT), Mundra (14.893 MT), Dharma Chandbali (12.734 MT), Kandla (11.336 MT) and Gangavaram (11.237 MT) ports. [Ref table : 7.5]
4. In 2016-17, export of coal was 1.773 MT compared to 1.575 MT in 2015-16. Coal was mainly exported to Bangladesh (1.051 MT) and Nepal (0.639 MT). [Ref table : 7.4]
5. Coal was mainly exported through Borsorah (0.550 MT), Panitanki (0.448 MT), Chasuapara (0.251 MT), Nautanwa/ Sonauli (0.118 MT) and Dawki (0.116) ports. [Ref table :7.6]

(E) Captive Coal block

1. In the year 2016-17, the total production of raw coal from captive coal blocks in India was 37.434 MT compared to 31.101 MT in 2015-16, resulting an increase of 20.36% over 2015-16. During 2016-17, production of coal from coal blocks allocated for Power Sector was 27.381 MT over 25.670 MT coal produced in 2015-16. [Ref table 9.9(a) and 9.9(b)]

(F) Comparison between Provisional and Final figures

The following statement shows comparison between Provisional and Final figures of Production and Despatch of Coal and Lignite during last Five Years.

Year	Item	Production (Quantity in Million Tonnes)				Despatch (Quantity in Million Tonnes)			
		Coking Coal	Non Coking Coal	Total Coal	Lignite	Coking Coal	Non Coking Coal	Total Coal	Lignite
2012-13	Provisional	51.834	505.873	557.707	46.598	55.212	514.555	569.767	46.312

(G) Geological Coal Reserve

As per Geological Survey of India, geological reserves of coal in India as on 01.04.2017 was 3,15,149 Million Tonnes. The type wise break up of coal reveals that reserve of coking coal (prime, medium and semi-coking) was 34,534 Million Tonnes and non-coking coal was 2,80,615 Million Tonnes.

Total coal extracted since 1950 up to 2016-17 was around 144,41,821 Million Tonnes.

	Total	703.098	190.972	1.778	189.194	70.170	82.835	-12.665	879.627

Note: Total Primary Supply is estimated as sum of indigenous production, Net Import & Stock Change. For simplicity, only stock change of pit head stock is taken.

Section II

Resources & Exploration

2.1 Indian coal deposits: The Indian coal deposits are primarily concentrated in the Gondwana sediments (Upper Paleozoic to Mesozoic systems) located in the Eastern and Central parts of Peninsular India and also in parts of North Eastern Regions Viz., Sikkim, Assam and Arunachal Pradesh. The coal is of bituminous to sub-bituminous rank and is restricted to the sediments of Permian age.

2.1.1 Seams of these coalfields generally range in thickness from 1.0 m to 30.0 m, with exceptionally thick seams of 134.0 m found in Singrauli coalfield. The coalfields have been faulted but otherwise are not highly tectonised.

2.1.2 The Tertiary coal bearing sediments are found in North-Eastern India, spreading over the states of Assam, Arunachal Pradesh, Nagaland and Meghalaya of which the Assam Coal fields are the prominent ones. Here coalfields are highly disturbed tectonically and sub-bituminous to high volatile bituminous with high sulphur contents.

2.2 Indian lignite deposits: Indian lignite deposits are in the Tertiary sediments in the Southern & Western parts of the peninsular shield, particularly in Tamil Nadu, Pondicherry, Gujarat, Rajasthan and Jammu & Kashmir. It is also available, in minor quantity, in Kerala & West Bengal.

2.3 Exploration: Exploration of coal resources in the country is carried out in two stages. In the first stage, Geological Survey of India (GSI) and various State Directorates of Geology & Mining undertake regional exploration with one or two Borehole per sq. km for locating potential coal and lignite bearing areas on a regular basis under the funding from the Ministry of Mines, Government of India. This effort is supplemented by Mineral Exploration Corporation Ltd. (MECL), Geological Survey of India, Central Mine Planning and Design Institute Ltd. (CMPDIL) through promotional regional exploration under funding from the Ministry of Coal.

2.3.1 In the 2nd stage, detailed exploration is carried out by CMPDIL, a subsidiary of Coal India Ltd. directly as well as through MECL, State Governments and private agencies for the purpose of mine planning and exploitation of coal resources for meeting the demand of different sectors of the economy. The detailed exploration in the command area of SCCL is carried out by SCCL itself. Nowadays, many private exploration agencies have also been undertaking detailed exploration in regionally explored coal blocks mainly under the supervision of CMPDIL.

2.3.2 CMPDIL acts as a nodal agency for distribution of funds provided by the Ministry of Coal for exploration besides supervising the work of MECL in the area of promotional exploration of coal.

2.3.3 Priorities of various projects/ blocks, taken up for detailed exploration, are decided taking into account factors like emerging demand and its locations, availability of infrastructure for coal evacuation and techno-economic feasibility of the mine development including the coal quality.

2.4 Coal Reserves: Detailed data on Coal resources, as on 1st April 2016, by type of coal for different coal bearing States, field-wise and grade-wise are provided in **Tables 2.1 to 2.5**.

2.4.1 As per GSI compilation of resources as on 1st April 2017, in situ geological resources of coal in India up to a depth of 1200 meters is 315.149 Billion Tonnes (BT) which includes proved, indicated and inferred resources. Out of the total geological resources in the country, 297.190 BT (94.30%) are shared by six states, Jharkhand 82.440 BT (26.16%), Odisha 77.285 BT (24.52%), Chhattisgarh 56.661 BT (17.98%), West Bengal 31.667 BT (10.45%), Madhya Pradesh 27.673 BT (8.78%) and Telangana 21.464 BT (6.81%).

2.4.2 Out of the total resource of 315.149 BT as on 1st April, 2017, the share of proved, indicated and inferred resources are 143.058 BT, 139.311 BT and 32.780 BT respectively.

2.4.3 Of the total resources, the share of Prime Coking was 5.313 BT (1.69%), Medium Coking 27.513 BT (8.73%), Blendable / Semi Coking 1.708 BT (0.54%). Share of Non-coking coal (Including High Sulphur) was 280.615 MT (89.04%). It is to be noted that the increase in the total resource from 2015 to 2017 was noticed mainly in case of Non-coking coal.

2.5 **Lignite Reserves:** Neyveli Lignite Corporation (NLC) programs, coordinates and reviews the regional exploration work concerning lignite resources. Detailed data on lignite resources are available in **Table 2.6** and **Table 2.7.**

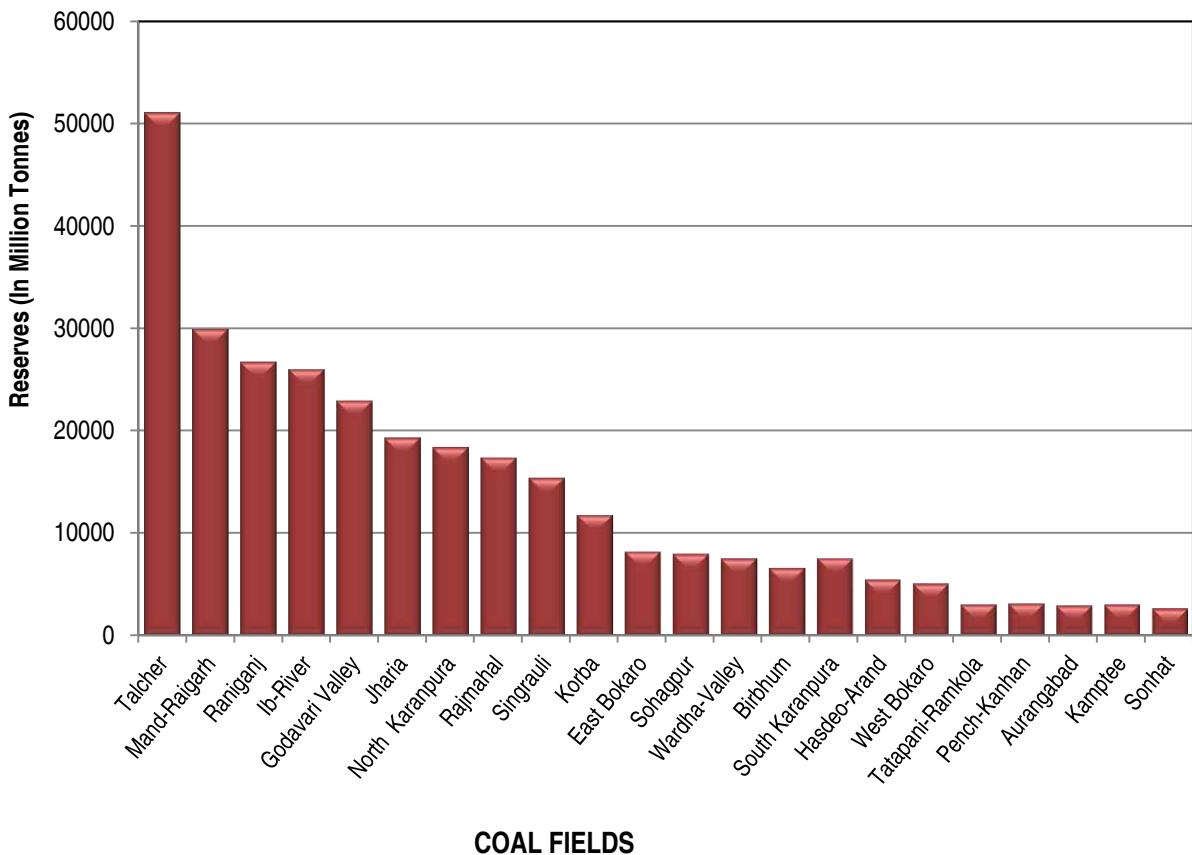

2.5.1 Total lignite resources of the country as on 1st April 2017 was 44.698 Billion Tonnes (BT) which included proved, indicated and inferred resources. Out of the total lignite resources, almost all i.e. 44.240 BT (98.98%) was shared by three major states, Tamil Nadu 35.782 BT (80.05%), Rajasthan 5.736 BT (12.83%) and Gujarat 2.722 BT (6.09%).

2.5.2 Information on agency wise and Coal Company command area wise promotional drilling and detailed drilling achievement during the IXth, Xth, XIth and XIIth plan period are reported in **Tables 2.8** and **Table 2.9.**

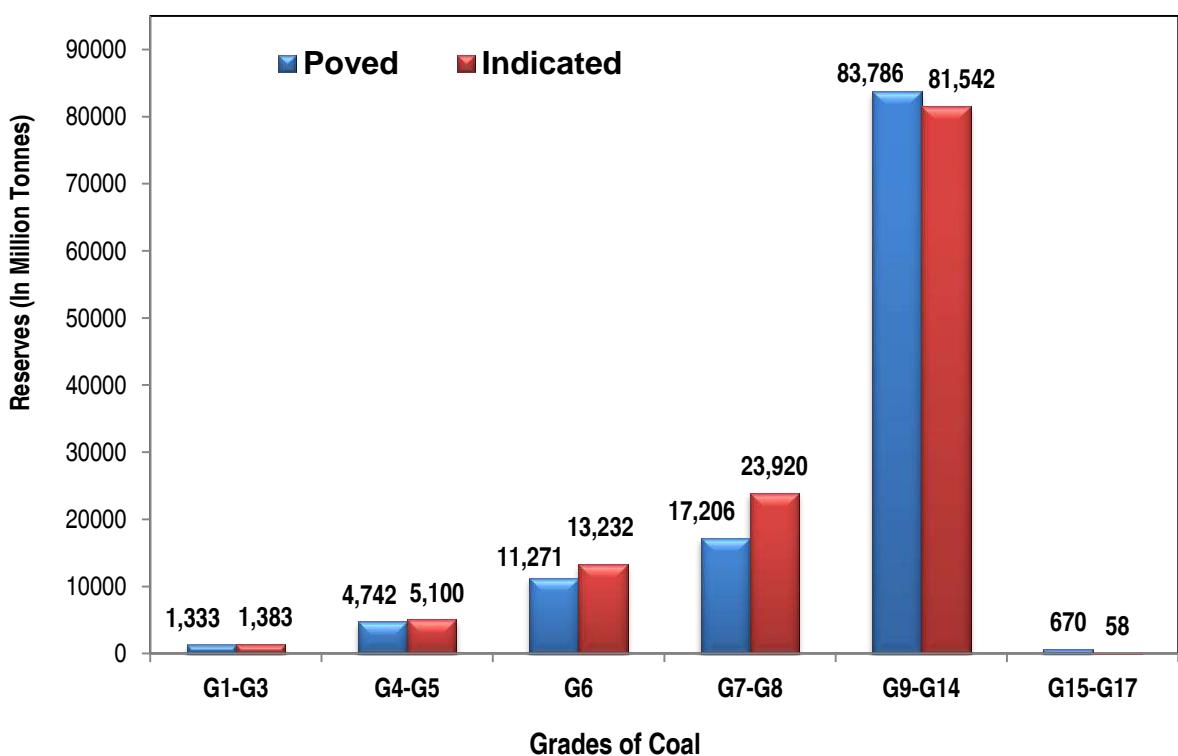

2.6 The different exploration stages and agencies involved in the exercise are summarized below for easy comprehension of the readers.

Exploration Stage: Regional	
(funded by Ministry of Mines)	
Exploration Agencies	
1.	Geological Survey of India
2.	State Directorates of Geology & Mining
Exploration Stage: Regional (Promotional funded by Ministry of Coal)	
Exploration Agencies	
1.	Geological Survey of India
2.	Mineral Exploration Corporation Ltd.
3.	Central Mine Planning and Design Institute Ltd.
Exploration Stage: Detailed	
Exploration Agencies	
1.	Central Mine Planning and Design Institute Ltd.
2.	Singareni Collieries Company Ltd.
3.	Mineral Exploration Corporation Ltd.
4.	Neyveli Lignite Corporation Ltd.
5.	State Directorates of Geology & Mining.
6.	Private Agencies.
Exploration Stage: Developmental	
Exploration Agencies	
1.	Coal India Limited's Subsidiaries including Central Mine Planning and Design Institute Ltd.
2.	Singareni Collieries Company Ltd.
3.	Neyveli Lignite Corporation Ltd.
4.	Private Parties/ Coal Mine Owners.

Section III

Production & Productivity

3.1 Production

3.1.1 In 2016-17, production of raw coal in India was 657.868 MT, showing an increase of 2.9% over the previous year. In that year production of lignite was 45.230 MT, showing an increase of 3.2% over 2015-16.

3.1.2 Statement 3.1 shows production of coal in 2016-17 by different companies.

Statement 3.1: Coal Production (Excluding Lignite) in India by Company			
Company	Coal Production (2016-17) [MT]		
	Coking	Non-coking	Total
ECL	0.031	40.486	40.517
BCCL	32.393	4.644	37.037
CCL	21.988	45.059	67.047
NCL		84.096	84.096
WCL	0.131	45.501	45.632
SECL*	0.110	139.893	140.003
MCL		139.208	139.208
NEC		0.600	0.600
CIL	54.653	499.487	554.140
SCCL		61.336	61.336
Other Public	0.692	9.028	9.720
Total Public	55.345	569.851	625.196
Total Private	6.316	26.356	32.672
ALL INDIA	61.661	596.207	657.868

*Including Production from SECL (GP-IV/1) and (GP-IV/2&3) coal blocks.

It can be seen that Coal India Ltd. accounted for 84.2% of coal production in the country. The share of SCCL in the coal production was 9.3%. Contribution from public sector and private sector was 95.0% and 5.0% respectively. The major contribution to the total coal production of the country in 2016-17 came from SECL (21.3%), MCL (21.2%), NCL (12.8%) and CCL (10.2%). The production from these four companies collectively accounted for 65.4% of the total coal production of the country. From Statement 3.1 it can also be seen that the major share in total coal production was of non-coking coal (90.6%).

3.1.3 Statement 3.2 shows coal production in India during 2016-17 by states. From this statement it can be observed that the four major coal producing states were Odisha (21.2%), Chhattisgarh (21.1%), Jharkhand (19.2%) and Madhya Pradesh (16.0%). These four states together produced accounted for about 77.4% of the total coal production in the country.

Statement 3.2: Coal Production in India by State			
States	Coal Production (2016-17) [MT]		
	Coking	N-Coking	Total
Assam		0.6	0.6
Chhattisgarh	0.11	138.415	138.525
Jammu & Kashmir		0.01	0.01
Jharkhand	59.604	66.831	126.435
Madhya Pradesh	0.131	104.882	105.013
Maharashtra		40.559	40.559
Meghalaya		2.308	2.308
Odisha		139.359	139.359
Telangana		61.336	61.336
Uttar Pradesh		16.056	16.056
West Bengal	1.816	25.851	27.667
Total	61.661	596.207	657.868

3.1.4 Statement 3.2 also shows that almost all coking coal was produced in the state of Jharkhand which accounted for 96.7% of the total coking coal production. It can also be seen that during 2016-17, the production of coking coal registered an increase of 1.27% over 2015-16 whereas in the case of non-coking coal the increase was 3.09%.

3.1.5 From Table 3.16 it can be observed that in 2016-17, the production from the opencast system of mining accounted for 93.3% of the total coal production and the rest 6.7% was accounted by underground system of mining. From this table it is interesting to note that the share of opencast mining in total coal production has been steadily

increasing over time and in the last ten years it has increased from 87.11% in 2007-08 to 93.26% in 2016-17 whereas in case of underground mining the share has a decreasing trend of 12.89% in 2007-08 to 6.74% in 2016-17.

3.1.6 From table 3.3, it can be seen that the production of total coal products increased from 43.194 MT in 2015-16 to 45.065 MT in 2016-17. It can also be seen that the production of washed coal, both coking and non-coking increased by 3.8% and 18.4% respectively, whereas the production of middlings (coking) decreased by 16.8% over 2015-16. In 2016-17, the production of hard coke also decreased by 4.1% over 2015-16. The production of washed coal (coking and non-coking) was 26.688 MT against the total raw coal production of 657.868 MT in 2016-17.

3.1.7 Stripping Ratio defined as the ratio of OBR (over burden removal) to coal produced in opencast mining has been of interest to the researchers. From table 3.19 it can be seen that in 2016-17, the stripping ratio at all India level was 2.65 while it was 2.67 in 2015-16. The stripping ratio of CIL was 2.21 and of SCCL 6.03. in 2016-17, the stripping ratio for the public sector was 2.56 and for the private sector 4.56. In case of CIL subsidiaries, MCL reported the lowest stripping ratio of 0.89 whereas NEC reported the highest stripping ratio of 9.51.

3.1.8 Output Per Man Shift (OMS) is one of the measures of efficiency for the production. Table 3.20 shows OMS for 2016-17 of two major players in the public sector namely CIL and SCCL by type of mining. It is may be seen that during 2016-17, in respect of opencast mining, OMS (in Tonnes) of CIL was 15.0 and SCCL 13.85. In case of underground mining the trend is almost static. From Table 3.20 it can also be seen that in case of CIL (OC), OMS has shown an increasing trend in last nine years, from 8.60 in 2007-08 to 15.35 in 2015-16. In case of SCCL, the trend is fluctuating one over the last ten years.

Statement 3.3: OMS (Tonnes) in OC & UG Mines in 2015-16 and 2016-17 (CIL & SCCL)

Year	Company	2015-16	2016-17
OMS (OC)	CIL	15.35	15.0
	SCCL	13.78	13.85
OMS (UG)	CIL	0.80	0.80
	SCCL	1.25	1.18
OMS (Overall)	CIL	7.15	7.48
	SCCL	4.20	4.74

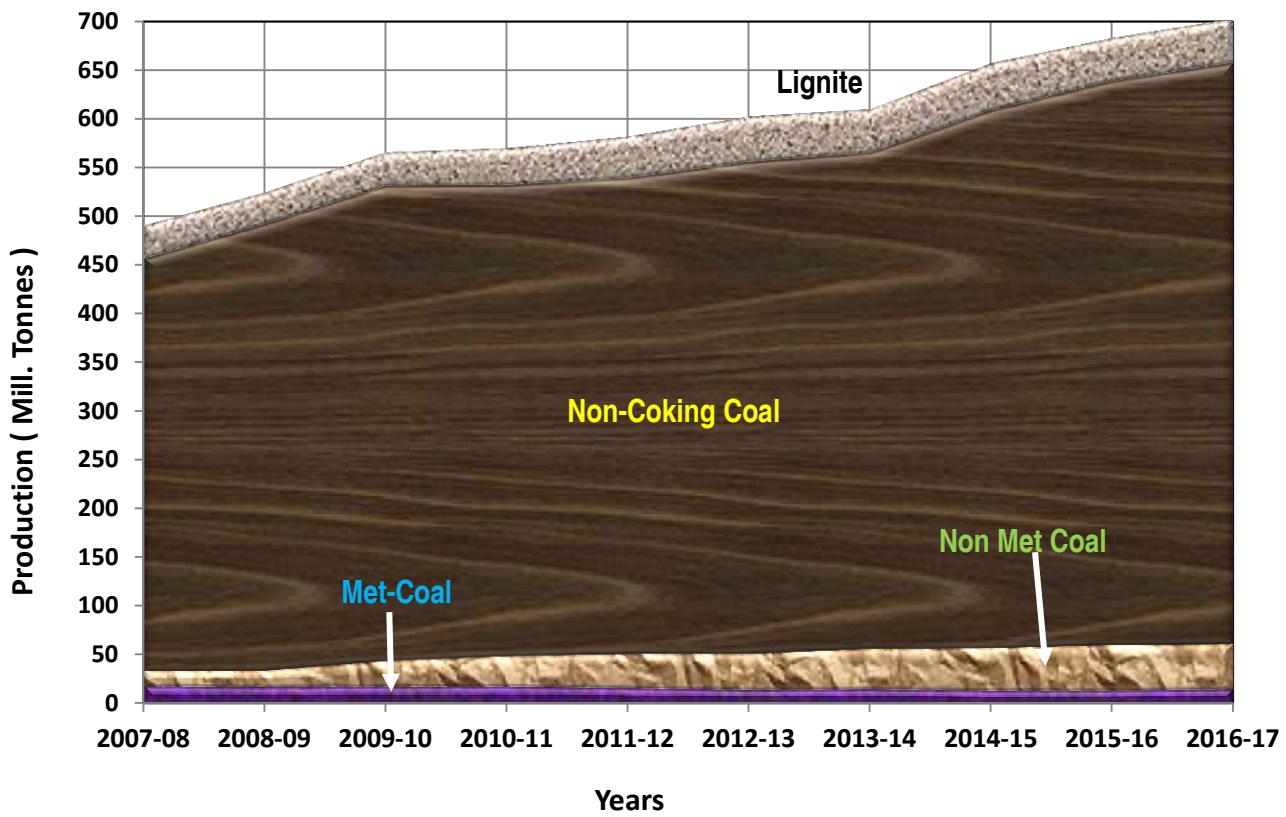

3.1.9 Lignite Production: Statement 3.4

shows production of lignite by different companies in 2015-16 and 2016-17. It can be seen that in case of lignite the three major companies were NLC, GMDCL and BLMCL which contributed 58.05%, 15.89% and 15.23% respectively to the total lignite production of 2015-16. In 2015-16, lignite production decreased by 9.17% over 2014-15. However, lignite production increased by 9.03% in 2014-15 over 2013-14. In 2015-16, production of all the companies declined significantly.

Statement 3.4: Lignite Production(MT) in India by Company in 2015-16 and 2016-17

Company	2015-16	2016-17
NLC	25.451	27.617
GMDCL	6.968	7.652
BLMCL	6.679	6.010
GIPCL	3.063	2.816
RSMML	0.972	0.549
VSLPL	0.617	0.508
GHCL	0.092	0.078
All India	43.842	45.230

Chart III.1 - Area Graph : Trend of Production of Different types of Solid Fossil Fuel during 2007-2008 to 2016-2017

Production of different types of solid fossil fuels during 2007-08 TO 2016-17 (Quantity in Mill.Tonnes).

Year (1)	Met Coal (2)	Non Met Coal (3)	Total Coking (4)	Non-Coking (5)	Total Raw Coal (6)	Lignite (7)
2007-08	18.065	16.390	34.455	422.627	457.082	33.980
2008-09	17.301	17.508	34.809	457.948	492.757	32.421
2009-10	17.731	26.682	44.413	487.629	532.042	34.071
2010-11	17.695	31.852	49.547	483.147	532.694	37.733
2011-12	16.239	35.421	51.660	488.290	539.950	42.332

Washed Coal Production (Coking)

Middling Production (Coking)

Hard Coke Production

Note: 1. The above figures relates to Washeries (public & private) of only coal producing companies.
2. Hard Coke data relates to steel plants only. There are Private sector, specially in small scale, data of which are not readily available.

Note: (1) *Growth (%) is calculated over similar period of last year.

(2) **Share (%) is calculated as ratio to yearly production.

(3) The above figures relates to Washerries (public & private) of only coal producing companies.

Private washerries (only washerries, having no coal blocks) are not included here.

(4) Hard Coke data relate to steel plants only.

Note: (1) Stripping ratio is defined as the ratio of OBR to Coal produced in Open Cast mining.

(2) Meghalaya OBR figures are not known and not reported.

(3) While calculating stripping ratio, if OBR not reported, corresponding production was excluded to find public/private sector OBR

Section IV

4.1 Despatch & Off-take

4.1.1 In 2016-17, despatch of raw coal was 645.978 MT, against 632.442 Mt in 2015-16, thus increased by 2.14% over 2015-16.

4.1.2 Statement 4.1 shows despatch of raw coal (coking and non-coking) by public and private sector in 2016-17.

Statement 4.1: Despatch of Raw Coal			
Company	Coal Despatch (2016-17) [MT]		
	Coking	Non-coking	Total
ECL	0.029	42.779	42.808
BCCL	31.08	3.733	34.813
CCL	21.038	39.895	60.933
NCL		83.491	83.491
WCL	0.115	39.377	39.492
SECL*	0.015	137.645	137.660
MCL		143.007	143.007
NEC		0.777	0.777
CIL	52.277	490.704	542.981
SCCL		60.791	60.791
Other Public	0.720	8.906	9.626
Total Public	52.997	560.401	613.398
Total Private	6.311	26.269	32.580
ALL INDIA	59.308	586.670	645.978

*Including Production from SECL (GP-IV/1) and (GP-IV/2&3) coal blocks.

It can be seen that Coal India Limited accounted for 84.1% of coal despatch in the country. The share of SCCL in the coal despatch was 9.4% and the contribution of private sector was 5.0%. In the CIL group, the major share in despatch was MCL (22.1%), SECL (21.3%) and NCL (12.9%). These three companies collectively accounted for 56.3% of the raw coal despatch at all India level.

4.1.3 Concept of despatch and off-take has been explained in Section 1. In Statement 4.2, despatch and off-take of raw coal in 2016-17, has been shown.

Statement 4.2 : Despatch and Off-take of Raw Coal in India in 2016-17 by Company [MT]

Company	Raw Coal	
	Despatch	Off-take
ECL	42.808	43.019
BCCL	34.813	34.854
CCL	60.933	60.934
NCL	83.491	83.491
WCL	39.492	39.497
SECL*	137.660	137.672
MCL	143.007	143.012
NEC	0.777	0.777
CIL	542.981	543.256
SCCL	60.791	60.805
Other Public	9.626	9.626
Total Public	613.398	613.687
Total Private	32.580	32.580
ALL INDIA	645.978	646.267

*Including Production from SECL (GP-IV/1) and (GP-IV/2&3) coal blocks.

4.1.4 Statement 4.3 shows despatch of washed coal and middlings in 2016-17 by different companies. It may be observed that share of public sector in washed was 84.4% and middling was 66.4%.

Statement 4.3 : Despatch of Washed Coal and Middlings in 2016-17 (MT)

Company	Washed coal	Middlings
BCCL	1.181	1.089
CCL	9.562	1.359
NCL	3.155	
WCL	0.041	0.034
IISCO	0.730	0.523
RRVUNL	7.342	
Public	22.011	3.005
TISCO	3.339	1.520
CESC	0.744	
Private	4.083	1.520
Total	26.094	4.525

4.1.5 Statement 4.4 shows details on despatch and off-take of raw coal to different sectors of the industry in the country during 2016-17. It may be seen that out of total despatch to different sector, maximum share was of power utility 76.0% and power captive 6.8%. The share of steel, cement, sponge Iron etc. are shown in the statement.

Statement 4.4: Despatch of Raw Coal in India in 2016-17 to different sectors [MT]	
Sector	Despatch & Off-take [MT]
Power (Utility)	490.99
Power (Captive)	44.057
Steel	10.131
Cement	6.356
Sponge Iron	5.557
Fertilizers	2.135
Pulp & Paper	1.181
Other Basic Metal	5.038
Chemical	0.312
Textiles & Rayons	0.243
Steel Boiler	0.205
Bricks	0.099
Others	79.677
Total Despatch	645.978
Colliery Consumption	0.289
Total Off-take	646.267

4.1.6 Statement 4.5 shows that out of total despatch of lignite in 2016-17, share of despatch to power utility was 56.3% and power captive 33.7%.

Statement 4.5: Despatch of Lignite in India in 2016-17 to different sectors [MT]	
Sector	Despatch & Off-take [MT]
Power (Utility)	24.284
Power (Captive)	14.540
Steel Boiler	0.035
Cement	0.291
Sponge Iron	0.038
Pulp & Paper	0.526
Chemical	0.196
Textiles & Rayons	1.292
Bricks	0.415
Others	1.538
Total Despatch	43.155
Colliery Consumption	0
Total Off-take	43.155

Note: (i) Raw Coal sent to coking and non coking washery, as the case may be, reported accordingly.

(ii) Power which is generated and used for commercial purpose is considered as Power(Utility).

(iii) Power which is generated and utilized/consumed for their own use is considered as Power(Captive).

(D) Export	1.575	1.773										
			Statistical Difference				-1.097				-0.473	
(E) Total Availability	877.841	879.613	Total Supply				877.841				879.613	

Note: It is assumed that there is no change in industrial stock. Washed coal has been converted into raw coal equivalent. In Coal Directory closing balance of a year is taken as opening balance of next year. However it is noted that there is a significant change between closing stock of last year and opening stock of this year. This resulted an increase (in absolute terms) in Statistical difference.

Section V

Pit Head Closing Stock

5.1 The concept of pit head closing stock has already been discussed in detail in Section- 1. It is to be noted that the concept of pit head closing stock of coal refers to raw coal. As on 31-03-2017, Pit head closing stock of coal was 75.952 MT and lignite 6.883 MT. Statement 5.1 shows details of pit head closing stock of raw coal and lignite for 2015-16 and 2016-17. It may be seen that in 2016-17, closing stock of coal and lignite increased over 2015-16. While raw coal increased by 16.2%, lignite increased by 43.1%.

Statement 5.1 Pit Head Closing Stock (MT) of Coal and Lignite in India at the end of 2015-16 and 2016-17		
Types of Fossil Fuel	Year	
	2015-16	2016-17
Coal		
Metallurgical	1.562	1.563
Non-metallurgical	7.162	9.602
Total Coking Coal	8.724	11.165
Non-coking	56.637	64.787
Total Raw Coal	65.361	75.952
Lignite	4.809	6.883

5.2 Statement 5.2 provides trend of closing stock of coal and lignite for the last ten years.

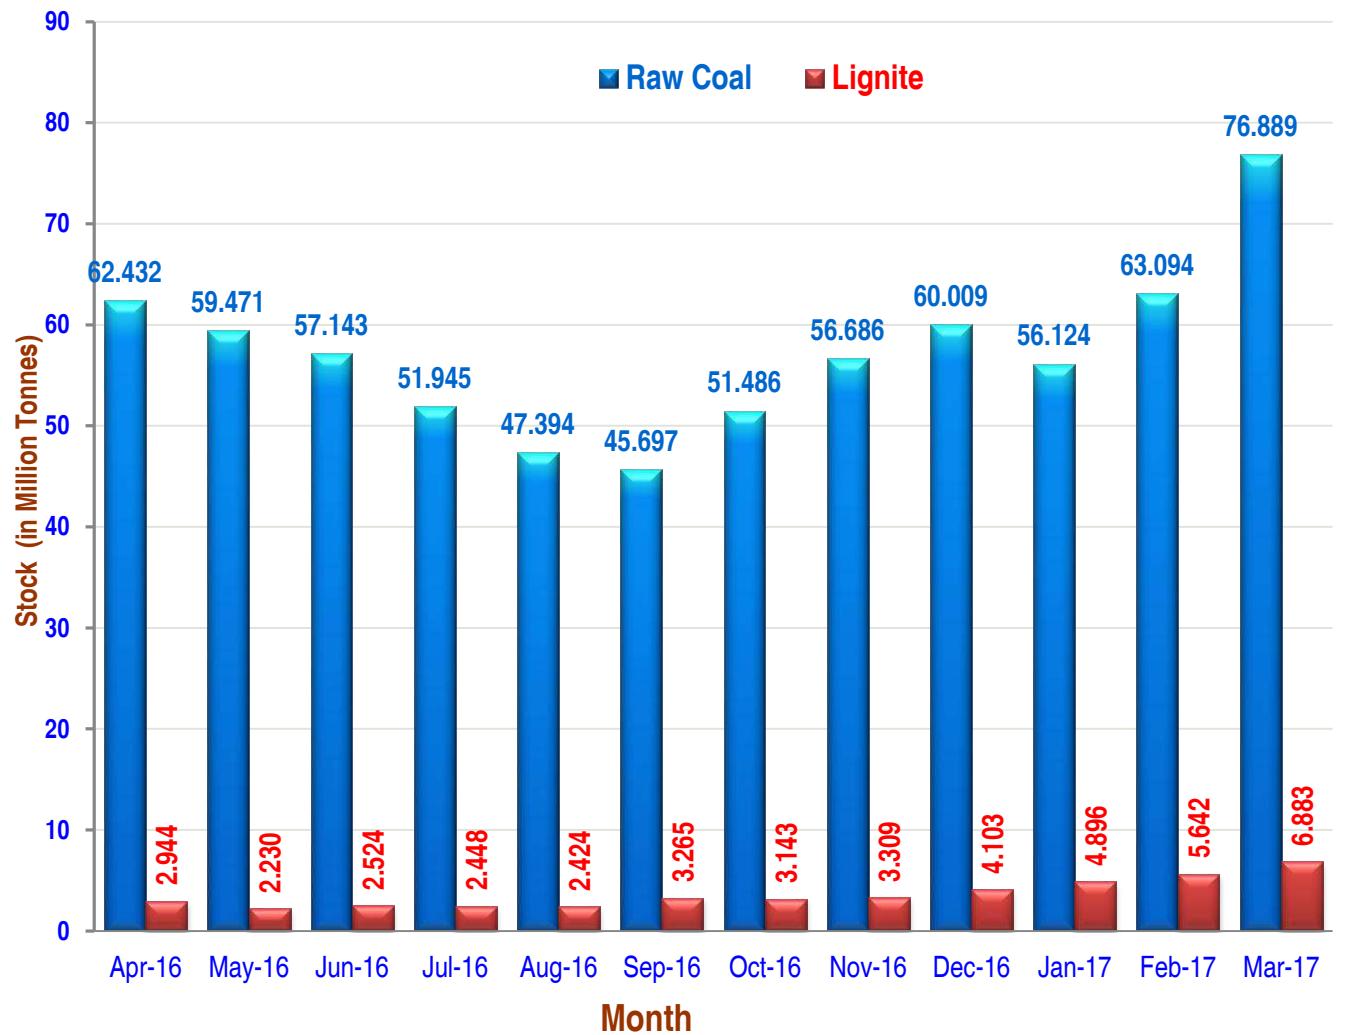

Statement 5.2 Pit Head Closing Stock (MT) of Coal and Lignite in India in last ten years.		
Year	Pit Head Closing Stock (MT)	
	Raw Coal	Lignite
2007-08	46.779	0.328
2008-09	47.317	0.903
2009-10	64.863	0.565
2010-11	72.192	0.610
2011-12	74.040	1.051
2012-13	63.049	1.493
2013-14	55.514	1.860
2014-15	59.389	3.176
2015-16	65.361	4.809
2016-17	75.952	6.883

It may be seen that in case of coal, the pit head closing stock had been increasing from 2007-08 till 2011-12 whereas in 2012-13 and 2013-14 it decreased. Again from 2014-15 it had increasing trend till 2016-17. In case of lignite, it also had increasing trend since 2010-11 till 2016-17.

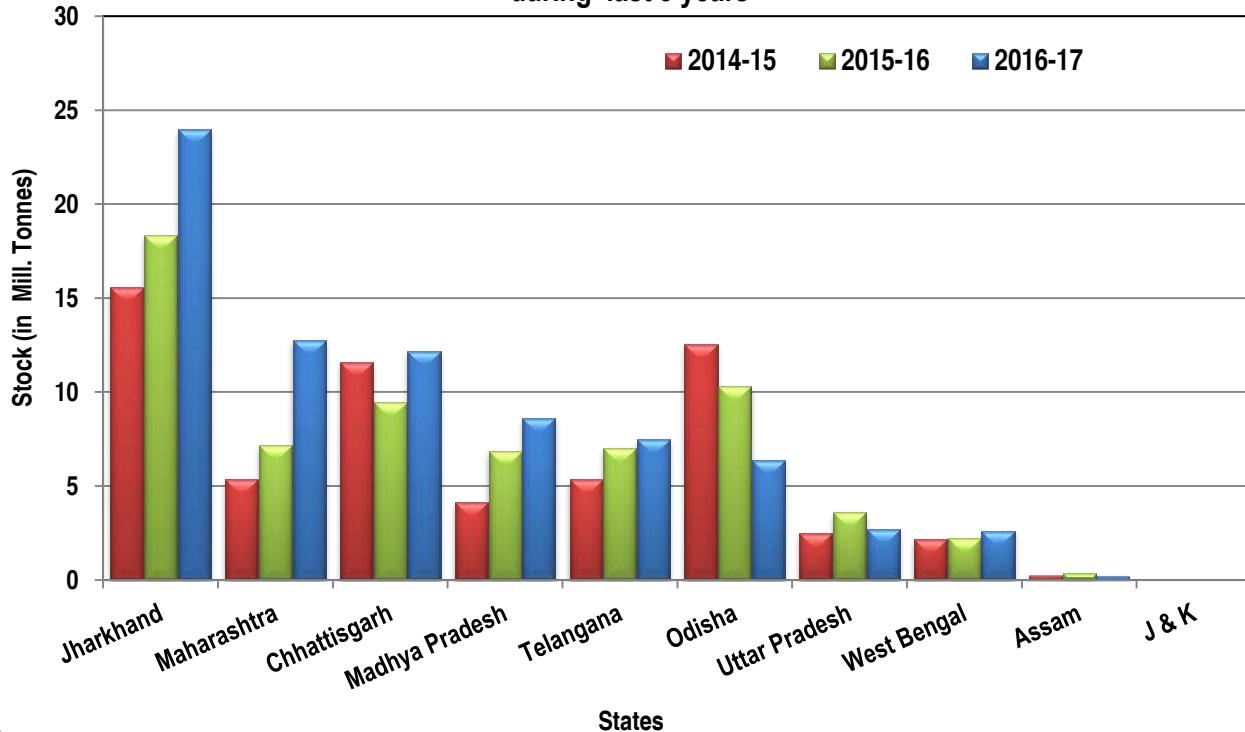

Statement 5.3 shows pit head closing stock of coal by companies for 2015-16 and 2016-17.

Statement 5.3: Company wise Pit Head Closing Stock (MT) of Coal and Lignite in India at the end of 2015-16 and 2016-17

Section VI

Pit-head Value, Price and Duty

6.1 Pit-head Value

6.1.1 Coal production in India (including lignite) in the year 2016-17 has already been discussed in Section III. In this section an attempt has been made to discuss pit-head value of coal produced, pit-head (ROM) price, etc. Statement 6.1 provides state wise production and value for coal and lignite for the year 2016-17.

Statement 6.1: State-wise Production (MT) and Value (Million Rs.) of Coal and Lignite for the year 2016-17		
Coal	Production	Value
Assam	0.600	2231.9
Chhattisgarh	138.525	104427.5
Jammu & Kashmir	0.010	59.9
Jharkhand	126.435	135188.0
Maharashtra	40.559	64267.7
Meghalaya	2.308	8585.4
Madhya Pradesh	105.013	148372.8
Odisha	139.359	103882.9
Telangana	61.336	110294.2
Uttar Pradesh	16.056	19731.1
West Bengal	27.667	68470.1
ALL INDIA	657.868	765511.5
Lignite		
Gujarat	10.546	13628.1
Tamilnadu	26.204	51991.8
Rajasthan	8.480	9815.1
ALL INDIA	45.230	75435.0

6.1.2 The total production of coal is the sum up of the production categorized under different grades. A better understanding requires grade-wise production and value. However, for a general time series view, Table 6.1 provides detailed data on total production and value of coal and lignite for every state for the last five years.

6.1.3 Table 6.2 provides data on state wise production of coal and its value by sector for captive and non-captive separately. The pit head (run of mine) price of coking coal of Coal India Limited for last a few years and 2016-17 is given in Table 6.5 and 6.6.

The pit head (run of mine) price of non-coking coal of CIL (after adoption of GCV band price since 2012) price has been given in Table 6.8, 6.9, 6.10 and 6.11. Price of Singareni Collieries Company Limited is given in Table 6.12, 6.13 and 6.14.

TABLE 6.1: STATE WISE PRODUCTION OF COAL AND LIGNITE vis-à-vis VALUE DURING LAST FIVE YEARS

Section VII

7.1 : Import & Export

7.1. In spite of sufficient coal reserve, we have not been able to meet our demand from our own production. Moreover, the supply of high quality coal (low-ash coal) in the country has been more limited than the low quality coal. Therefore, to bridge the demand-supply gap, we have no option but to resort to import of coal, especially low-ash coal.

7.2 As per our Import Policy 1993-94, coal has been put under Open General License (OGL) and therefore consumers are free to import coal based on their requirement. Superior quality non-coking coal is imported mainly by coast-based power plants and other industrial users viz., paper, sponge iron, cements and captive power plants, on consideration of transport logistics, commercial prudence, export entitlements and inadequate availability of such superior coal from indigenous sources.

7.3 In 2016-17, import of coal by India was 190.953 MT against import of 203.949 MT in 2015-16, thus import decreased by 6.4% over 2015-16. Import of coal, both in quantity and value is shown in Statement 7.1 below.

Statement 7.1: Import of Coal to India in 2016-17		
Type of Coal	Quantity [MT]	Value [Rs. Million]
Coking	41.644	412301
Non-Coking	149.309	590013
Total	190.953	1002314

It may be seen that the share of coking coal in the total quantity was 21.8% but it accounted for 41.1% of the total value of import.

7.4 Statement 7.2 shows country wise import of coal in India in 2016-17. It can be seen that Indonesia with 47.8% share remained the leading supplier followed by Australia 24.4% and South Africa 17.8%. These three countries together accounted for 90.0% **share in the country's import** in 2016-17.

Statement 7.2: Source Country-Wise Import of Coal by India during 2016-17		
Country	Quantity [MT]	Share
Indonesia	91.261	47.79%
Australia	46.654	24.43%
South Africa	33.980	17.79%
U S A	5.097	2.67%
Russia	4.200	2.20%
Mozambique	3.707	1.94%
Canada	2.377	1.24%
Columbia	2.001	1.05%
Chile	0.737	0.39%
Others	0.939	0.49%
Total	190.953	100%

7.5 The break-up of source country wise import for coking and non-coking coal during 2016-17 is given in statement 7.3 and statement 7.4 respectively.

Statement 7.3 Source Country-Wise Import of Coking Coal by India during 2016-17		
Country	Quantity [MT]	Share
Australia	36.503	87.65%
Canada	2.3	5.52%
U S A	1.148	2.76%
Mozambique	0.857	2.06%
New Zealand	0.475	1.14%
Russia	0.287	0.69%
Others	0.074	0.18%
Total	41.644	100%

Statement 7.4 Source Country-Wise Import of Non-Coking Coal to India during 2016-17		
Country	Quantity [MT]	Share
Indonesia	91.261	61.12%
South Africa	33.936	22.73%
Australia	10.151	6.80%
U S A	3.949	2.64%
Russia	3.913	2.62%
Mozambique	2.85	1.91%
Columbia	2.001	1.34%
Others	1.248	0.84%
Total	149.309	100%

Statement 7.5: Demand, Production and Import of Coal in India in last five years [MT]

Year	Demand *	Production	Import
2012-13	772.84	556.402	145.785
2013-14	769.69	565.765	166.857
2014-15	787.03	609.179	217.783
2015-16	910.00	639.230	203.949
2016-17	884.87	657.868	190.953

* Source: Annual Plan, MOC

7.7 Export of Coal : Although, there is short supply of coal in India compared to its demand and it has to resort to import of coal, India do export some quantity of coal to its neighbouring countries. In 2016-17, the export of coal was 1.773 MT and mainly exported to Bangladesh and Nepal, respective share was 59.3% and 36.0%.

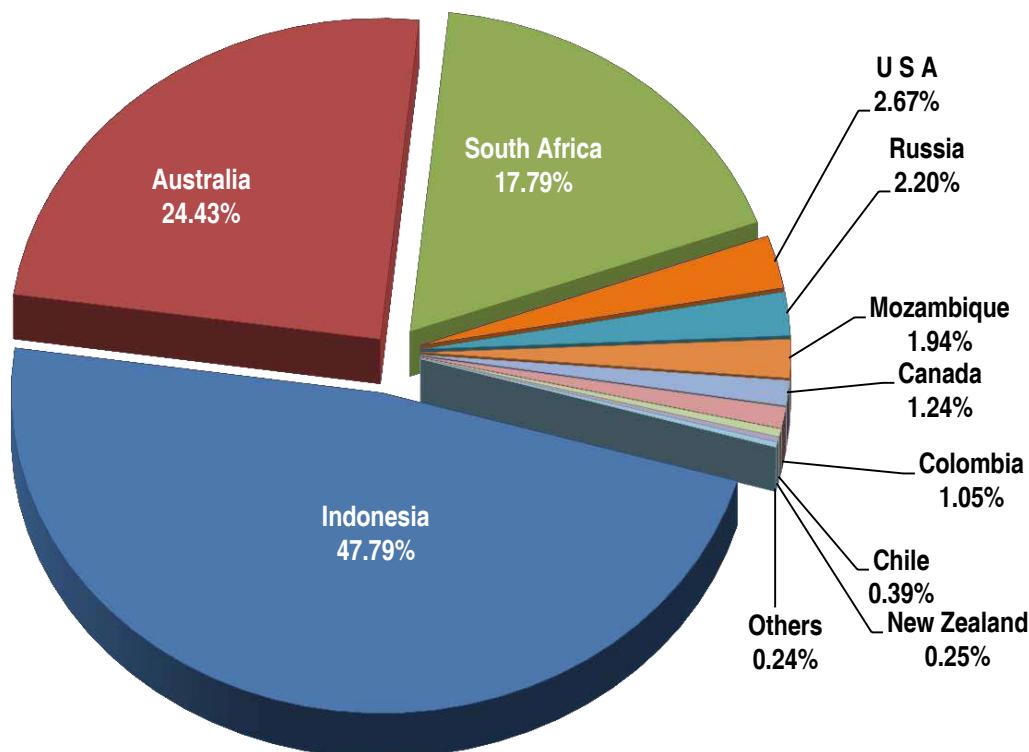

Out of the export, share of coking coal was 0.027 MT and that was exported to Bangladesh Pr. Export to other countries was totally negligible

Statement 7.6: Export of Coal from India by destination countries during 2016-17

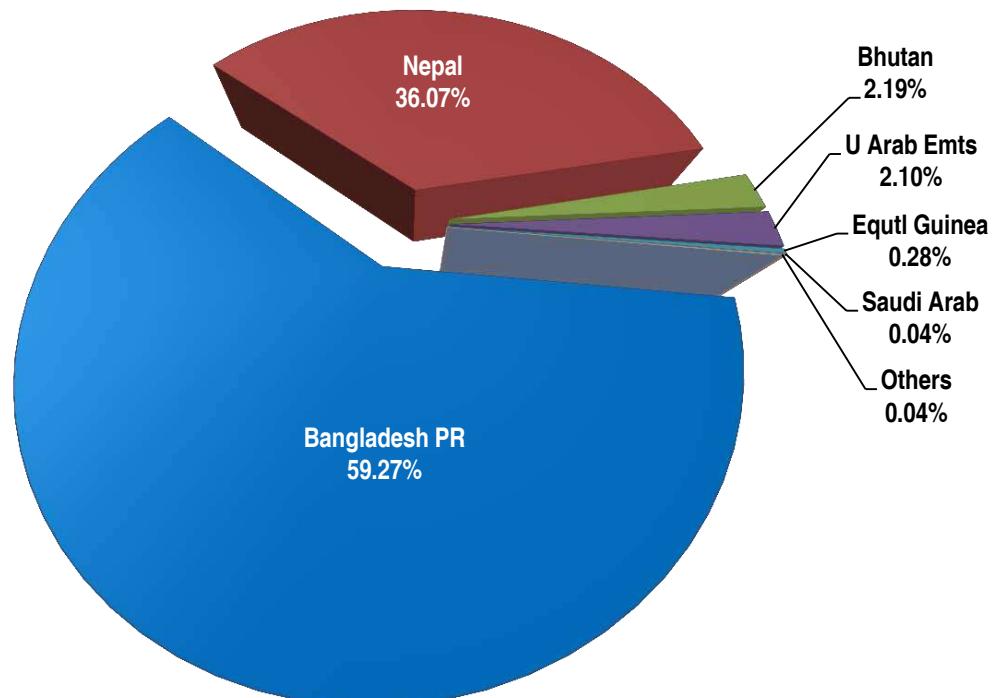

Country	Quantity [MT]	Share
Bangladesh PR	1.051	59.28
Nepal	0.639	36.04
Bhutan	0.039	2.20
United Arab Emnts	0.037	2.09
Others	0.007	0.39
Total	1.773	100%

7.6 Demand of coal of the country and its production vis-à-vis import during the last five years are given in statement 7.5.

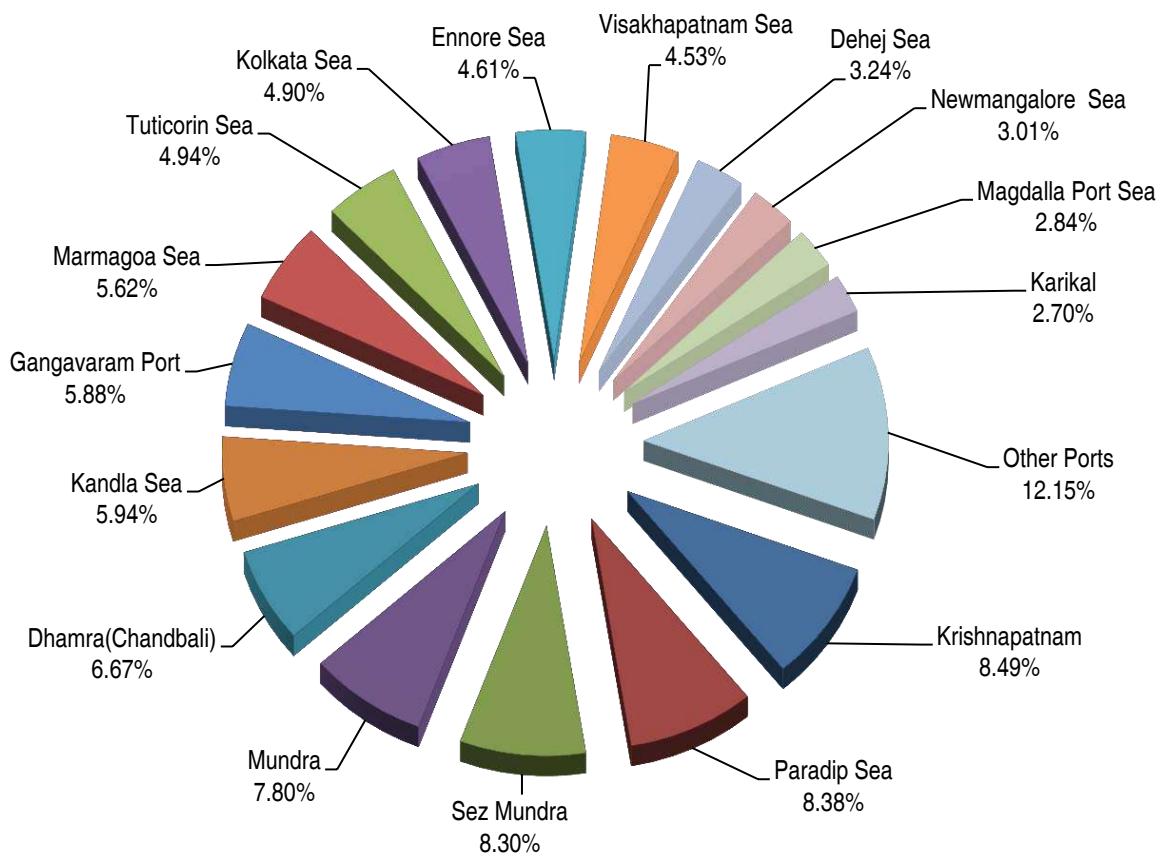

Ch.7.1: SHARE OF COUNTRY WISE IMPORT OF COAL IN 2016-17

Ch.7.2: SHARE OF COUNTRY WISE EXPORT OF COAL IN 2016-17

Ch.7.3 : SHARE OF PORT WISE IMPORT OF COAL IN 2016-17

Note:

Source: DGCI & S , KOLKATA

(1) Coke also includes soft coke, retort carbon which are negligible

(2) Some figures may not match with DGCI&S publication due to subsequent corrections and roundings.

(3) Coking coal, appeared to be exported from Meghalaya, should be treated as non coking coal for accounting purpose.

(4) Export data for 2009-10 and 2010-11 are revised.

Section VIII

Coal Consumption – A Sectoral Perspective

8.1 Consumption of Coal in India

8.1.1 Demand of Power, Steel and Cement in a developing country is closely related to its economic growth. Coal is one of the main inputs for steel, thermal power and cement industry. That is why distribution of coal of adequate quantity and quality to power sector followed by steel and cement manufacturing sector is considered a priority in Indian Coal Industry.

8.1.2 In blast furnace, iron ore, hard coke and limestone are used and hot air is injected into the base of the furnace. The molten iron or hot metal is periodically tapped and sent along with steel scrap and more lime stone to Basic Oxygen Furnace (BOF) to produce almost pure liquid steel. To economise on coking coal consumption, non-coking coal in pulverized form is sometime injected along with hot air. Here coke supplies carbon which acts as a reducing agent of iron ore as well as provides heat to melt the iron.

8.1.3 Coking coal when heated in absence of air, it softens, liquefies and resolidifies into hard but porous lumps called Hard Coke. Hard Coke is made in Coke Oven Batteries by high temperature carbonization (HTC). For manufacturing of hard coke, coking coal must have very low ash content, preferably within 19% and also low sulfur and phosphorous.

8.1.4 Generally Indian coking coal is characterised by high ash and low sulfur contents and therefore is not considered to be of adequate quality for steel plant. The quality of coal can be improved through the mechanism of washing but cost of washing, at times, is so high that it becomes uneconomical for commercial purpose. That is why, major share of total coking coal produced indigenously go for use for metallurgical purpose.

8.1.5 Imported coking coal having low ash content is blended with indigenous coking coal

for better use. Moreover, indigenous coking coal is washed in different washeries owned by various coal companies and integrated steel plants to reduce the ash content to make it suitable for use in the steel plant. In the process of washing, besides washed coal or clean coal by-products like middling and rejects/slurries are obtained. Middling so obtained is mostly used in the power sector.

8.1.6 Table 8.1 provides data on stock, receipt and consumption of indigenous and imported coking coal in integrated steel plants in the country. In 2016-17, the consumption of indigenous coking coal was 6.648 MT and that of imported coking coal was 21.534 MT. The corresponding figures for 2015-16 were 5.831 MT and 20.979 MT respectively. In 2016-17, in case of indigenous coking coal used by integrated steel plants, TISCO accounted for the consumption of 3.295 MT followed by SAIL 2.857 MT and 0.496 MT by VSP. In case of consumption of imported coking coal in 2016-17, consumption by SAIL 12.056 MT, TISCO 5.548 MT and VSP 3.930 MT.

8.1.7 Table 8.2 provides data on trend of consumption of coking coal by type. It also provides hot metal production and blend ratio.

8.2 Contribution of coal washeries

8.2.1 We have already explained the role of washeries in coal industry. Table 8.3 provides data on coking coal washeries in India in 2016-17. It may be seen that the total capacity of the coking coal washeries was 32.49 MTA. The share of public sector was 24.70 MTA and private sector 7.79 MTA.

8.2.2 Table 8.4 shows performance of coking coal washeries for last three years. It may be seen that the performance has been more or less static in the last three years of 2014-15, 2015-16 and 2015-16 having washed coking coal production of 6.072 MT 6.179 MT and

6.413 MT respectively. The corresponding yield percentages were 44%, 43% and 46% respectively.

8.2.3 Table 8.5 provides details of non-coking coal washeries in public sector and private sector and their installed capacities. Table 8.6 records the performance of these washeries for last three years.

8.3 Power Generation Capacity

8.3.1 Table 8.7 shows the details of installed power generating capacity at all India level in 2016-17. It can be seen that the total power generating capacity has increased from 105046 MW as on 31.03.2002 to 326832 MW as on 31.03.2017. In total power generating capacity as on 31-03-2017, mode wise share was thermal power 218330 MW, hydro power 44478 MW, renewable energy sources 57244 MW and nuclear power 6780 MW.

8.3.2 Table 8.8 shows the gross electricity generation by prime movers for last ten years. It may be seen that the total gross electricity generation in 2016-17 was 1235358 MKwH.

8.4 Cement

8.4.1 : Table 8.9 provides further details on cement and clinker capacity, production and capacity utilization in the country from the year 2000-01 to 2011-12. However, due to non-availability of data as a whole from **Cement Manufacturer's Association of India** since 2012-13, like previous years, state wise details of production, capacity etc. could not be incorporated since 2012-13.

8.4.2 Table 8.10 provides details of consumption of coal and fuel in cement sector for the period 2001-02 to 2016-17. As per information available from the **Cement Manufacturer's Association of India**, it may be observed that in 2016-17, the total consumption of coal (including lignite) in cement sector was 21.26 MT in the form of coal for kilns 10.62 MT, lignite 0.07 MT and pet coke 10.57 MT. The consumption by captive power plant in cement industry was 7.28 MT. However, information regarding the total cement production and the total consumption of coal etc. of the country was **not available from the Cement Manufacturer's Association of India**. This organization could

provide data only in respect of its member companies. Thus data at all India level was not available. The total receipt of coal including imported coal for cement manufacturing was 17.24 MT.

8.5 Some Key indicators for 2016-17

Installed Capacity of Coal Based Power Plants (Utilities) as on 31.03.2017	192163 MW
Electricity generation from coal based power plants in 2016-17 (Utilities)	944022 MKwH
Installed capacity of Coking Coal Washerries in 2016-17	32.49 MTA
Production of Washed Coking Coal in 2016-17	6.072 MT
Installed capacity of Non-coking Coal Washerries in 206-17	105.24 MT
Production of Washed Non-coking Coal in 2016-17	45.122 MT

Section IX

9.1 Captive Coal Blocks

9.1.1 The policy of the allotment of Captive Coal Blocks was adopted by the Government of India in the year 1993 and as per this policy by the end of 2013-14, out of total allocated 218 coal blocks, 80 coal blocks were de-allocated. Thus at the end of 2013-14, 138 coal blocks and 28 lignite blocks remained allocated under the category of Captive Coal Block. During the year 2014-15 by virtue of judgment dated 25.08.2014 read with the order dated **24.09.2014** of the Hon'ble Supreme Court of India, out of 218 captive coal blocks, allocation of 204 coal blocks were cancelled except allocation of 12 coal blocks for UMPPs and one coal block each allocated to NTPC and SAIL.

9.1.2 In the year 2014-15, by order of Hon'ble Supreme Court of India, allocation of 204 coal blocks were cancelled except Moher & Moher Amlori, Tasra, Pakri-Barwadi Coal Block and 10 UMPP Coal Blocks. As per Coal Mines (Special Provisions) Act, 2015, allocation of Schedule-I coal mines started by way of Public Auction or on the basis of Competitive Bidding. As on 31.03.2017 reallocation (either vested, allotted or Custodian) were done in respect of 84 coal blocks. Out these 84 coal blocks, 10 blocks started production. 03 more blocks given to CIL as Custodian had started production. Moher & Moher Amlori was already continuing production. Pakri-Barwadi of NTPC which was also not cancelled, started production. In 2016-17, production from those Captive Coal Blocks was 37.434 MT.

9.1.3 Further, out of non-cancelled 14 coal blocks, allocation of four coal blocks for UMPPs, namely, Chhatrasal coal block was cancelled on 07.05.2015 and Meenakshi, Meenakshi B and Dip side of Meenakshi blocks of UMPP were cancelled on 15.12.2015. As such as on 31.03.2017, 10 coal blocks allocated through earlier dispensations stand allocated.

9.1.4 Under the "Auction by Competitive Bidding Rules, 2012", 13 regionally explored coal blocks have been allotted to Central/State Government companies up to 31.03.2017.

Therefore, as on 31.03.2017, numbers of coal blocks stand exist as 107 (vested/allotted -77 + Custodian - 07 + Under Auction by Competitive Bidding Rules, 2012 - 13 and blocks allocated through earlier dispensations - 10).

TABLE 9.1: SUMMARY OF ALLOCATION OF COAL BLOCKS STAND ALLOCATED/ VESTED/UNDER CUSTODIAN/ALLOTTED UNDER AUCTION BY COMPETITIVE BIDDING RULES, 2012 & LIGNITE BLOCKS STAND ALLOCATED DURING 2016-17

Note.

GR quantities are GR value as available with this office and subject to change for few blocks with approval of Mine Plan. Extractable Reserve (in MT) have been shown against the newly Allocated/Vested coal blocks as per CM(SP) Act, 2015, as per the data available in this office. For other blocks, original GR have been shown as per available data.

World Coal Review

10.1 Reserve

10.1.1 World coal reserve (including lignite) is dispersed unevenly over different regions of the world. Statement 10.1 shows distribution of world coal reserves over different countries by end of 2016. It can be seen that the top five places, as per coal reserve, are occupied by USA (22.1%), Russian Federation (14.1%), China (21.4%), Australia (12.7%) and India (8.3%). These five countries together account for 78.6% of total world coal reserves.

Statement 10.1: World Proved Coal and Lignite Reserve (MT) at the end of 2016		
Country / Group	Reserve	% Share
USA	251582	22.08
China	244010	21.42
Russian Federation	160364	14.08
Australia	144818	12.71
India	94769	8.32
Germany	36212	3.18
Ukraine	34375	3.02
Kazakhstan	25605	2.25
Indonesia	25573	2.24
Poland	24161	2.12
Other Countries	97862	8.59
World	1139331	100

Source: International Energy Agency (IEA).

10.2 Production

10.2.1 In the World, in 2016, production of coal and lignite was 6312.50 MT and 787.31 MT respectively. In 2015, production of coal and lignite was 6747.57 MT and 811.11 MT respectively. Statement 10.2 shows main coal and lignite producing countries during 2016. In this Statement it can be seen that the top six positions are occupied by China (3360.18 MT), USA (811.49 MT), India (684.02 MT), Australia (508.67 MT), Indonesia (469.27 MT) and Russian Federation (349.28 MT) and these six countries together account for about 82.13% of total world coal and lignite production whereas China alone accounts for 44.63% of the world coal and lignite production.

Statement 10.2: World Coal and Lignite Production (MT) in 2016

Country / Group	Production	% Share
China	3083.79	43.43
USA	671.09	9.45
India	698.78	9.84
Australia	503.27	7.09
Indonesia	460.48	6.49
Russian Federation	365.46	5.15
South Africa	256.92	3.62
Germany	175.63	2.47
Poland	130.54	1.84
Kazakhstan	97.94	1.38
Others	655.91	9.24
World	7099.81	100%

10.2.2 World Coking Coal production during 2016 is given in Statement 10.3.

Statement 10.3: World Coking Coal Production (MT) in 2016

Country	Production	% Share
China	592.00	55.11
Australia	189.30	17.62
Russian Federation	83.45	7.77
India	54.65	5.09
USA	50.65	4.71
Canada	25.96	2.42
Mongolia	22.84	2.13
Poland	13.08	1.22
Kazakhstan	10.50	0.98
Others	31.85	2.96
World	1074.28	100.00

Source: International Energy Agency (IEA).

10.2.5 Statement 10.4 provides world lignite production during 2016 by major lignite producing countries.

Statement 10.4: World Lignite Production (MT) in 2016		
Country	Production	% Share
Germany	171.55	21.79
Russian Federation	73.73	9.36
USA	66.51	8.45
Australia	63.57	8.07
Poland	60.25	7.65
Turkey	56.85	7.22
India	44.98	5.71
Czech Republic	38.53	4.89
Serbia	38.44	4.88
Bulgaria	31.23	3.97
Others	141.68	18.00
World	787.31	100.00

Source: International Energy Agency (IEA)

10.3 Import and Export

10.3.1 In 2016, world coal import was 1327.06 MT against 1306.27 MT in 2015. In 2016, import of coking coal and steam coal was 282.05 MT and 1045.01 MT respectively. Import of lignite was 4.25 MT. Statement 10.5 shows major country wise import of coking coal and steam coal during 2016.

Statement 10.5: World Coal Import (MT) in 2016			
Country	Import		
	Coking Coal	Non Coking Coal	Total Coal
China	59.31	207.46	266.77
Others	29.97	183.80	213.77
Japan	51.14	138.28	189.42
Korea	34.80	100.90	135.70

Notes: Total proved reserves of coal- Generally taken to be those quantities that geological and engineering information indicates with reasonable certainty can be recovered in the future from known reservoirs under existing economic and operating conditions. The data series for total proved coal reserves does not necessarily meet the definitions, guidelines and practices used for determining proved reserves at company level, for instance as published by the US Securities and Exchange Commission, nor does it necessarily represent BP's view of proved reserves by country.

Reserves-to-production (R/P) ratio - If the reserves remaining at the end of any year are divided by the production in that year, the result is the length of time that those remaining reserves would last if production were to continue at that rate.

Reserves-to-production (R/P) ratios are calculated excluding other solid fuels in reserves and production.

Shares of total and R/P ratios are calculated using million tonnes figures.

Table 10.2: Trends of Coal Production By Major Coal Producing Countries during Last Ten Years

Source: BP Statistical Review of World Energy 2017

* Commercial solid fuels only, i.e. bituminous coal and anthracite (hard coal), and lignite and brown (sub-bituminous) coal, and other commercial solid fuels.

Excludes coal converted to liquid or gaseous fuels, but includes coal consumed in transformation processes.

^ Less than 0.05.

w Less than 0.05%.

n/a not available.

Excludes Estonia, Latvia and Lithuania prior to 1985 and Slovenia prior to 1990.

Notes: Differences between these consumption figures and the world production statistics are accounted for by stock changes, and unavoidable disparities in the definition, measurement or conversion of coal supply and demand data.

Annual changes and share of total are calculated using million tonnes oil equivalent figures.

Growth rates are adjusted for leap years.

Section XI

Mine Statistics

11.1.1 Mine statistics in terms of number and distribution of mines has been drawing attention of policy makers in the country. This section, therefore, deals with this aspect in detail. The information has been provided in tabular form in nine tables to describe Number of Mines, company-wise (Table11.1), Number of Mines, State-wise (Table11.2), Number of Mines, Sector-wise (Table11.3), Number of Mines, Captive/ Non Captive (Table11.4), Number of Mines, Public / Private, Captive/Non Captive (Table11.5), Number of Working Coal Mines (Table11.6), Number of working Lignite Mines (Table11.7), Number of Mines - State-wise, Public/ private, Captive/ Non captive (Table11.8), and Number of Lignite Mines, State-wise, Public/ private, Captive/ Non captive (Table11.9) as on 31.03.2017.

11.1.2 As on 31.03.2017, the total number of operating coal mines was 476. The state-wise distribution of these coal mines is given in statement 11.1.

Statement 11.1: state-wise distribution of coal mines as on 31.03.2017			
State	No. of coal mines		
	Captive	Non-Captive	Total
Assam	0	4	4
Chhattisgarh	8	47	55
Jammu & Kashmir	0	4	4
Jharkhand	1	131	132
Madhya Pradesh	4	60	64
Maharashtra	1	56	57
Meghalaya	0	3	3
Odisha	1	28	29
Uttar Pradesh	0	5	5
Telangana	0	47	47
West Bengal	1	75	76
All India	16	460	476

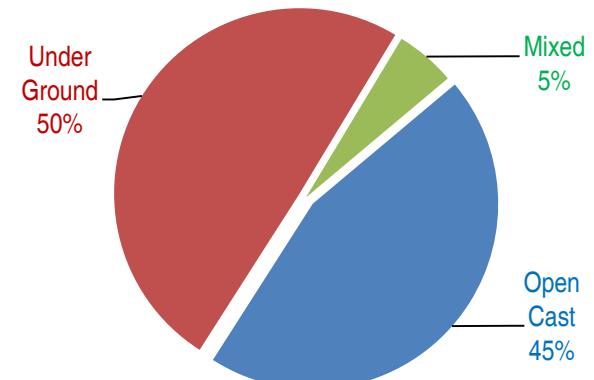

11.1.3 As on 31.03.2017, the total number of operating lignite mines was reported to be 19. The state-wise distribution of these lignite mines is given in statement 11.2.

Statement 11.2: state-wise distribution of lignite mines as on 31.03.2017

State	No. of coal mines		
	Captive	Non-Captive	Total
Gujarat	10	0	10
Rajasthan	5	1	6
Tamilnadu		3	3
All India	15	4	19

11.1.4 Depending on the situation, mine operation can be open cast, underground or mixed one. In India, the distribution of operating coal mines under different mining system is highlighted through the following chart.

Chart-II : Type of Coal Mines in India as on 31/03/2017
[OC, UG & MIXED]

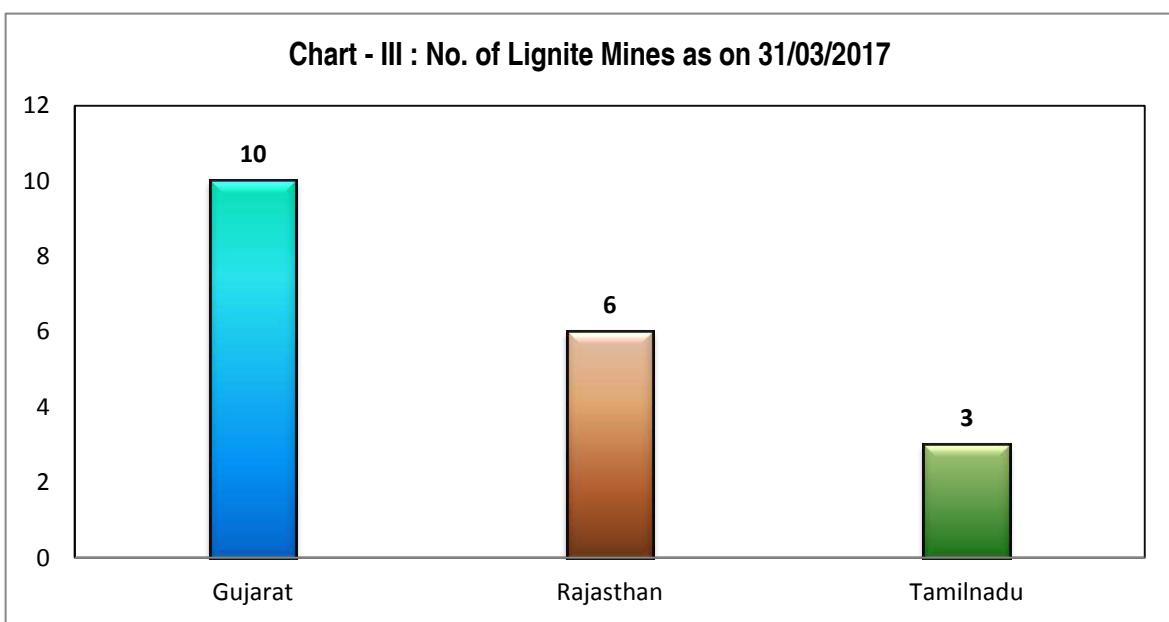

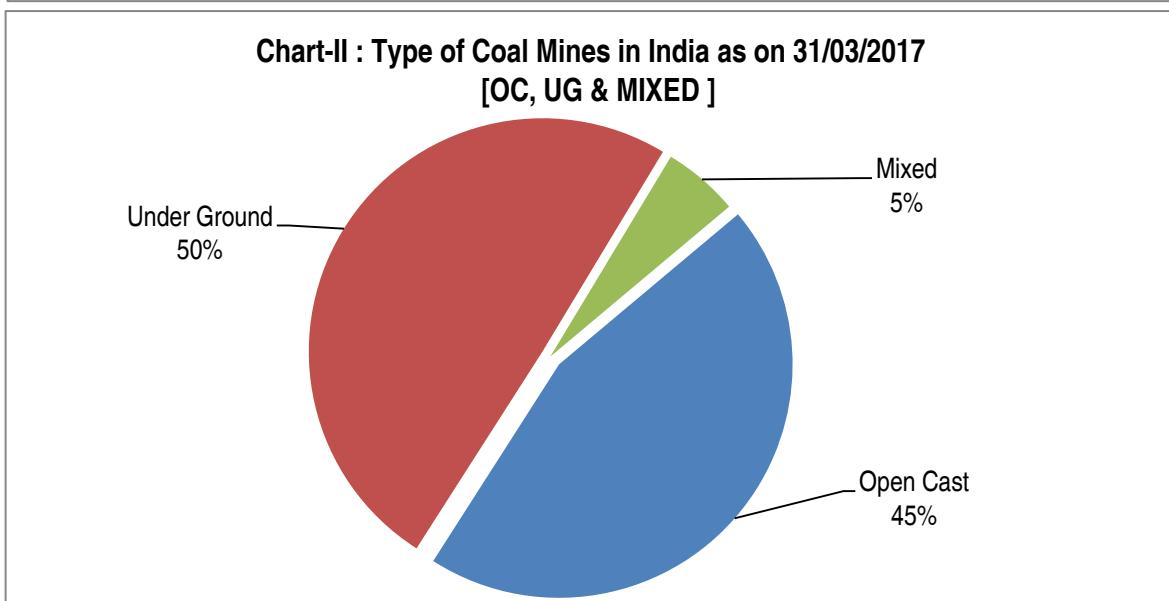

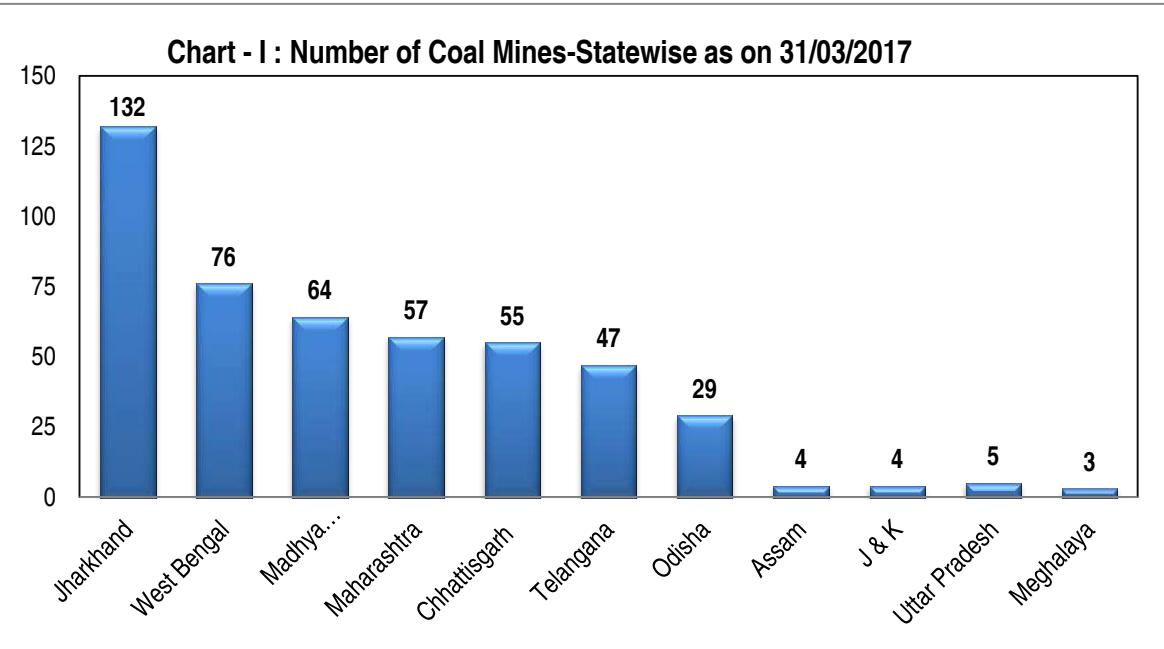

Table 11.1: Number of Coal & Lignite Mines -Companywise as on 31/03/2017

NOTE ON MEGHALAYA COAL

The Status of Coal Mining in the State of Meghalaya:-

In the last few years the state of Meghalaya has emerged as an important coal producer of the country. As reported by the Geological Survey of India, the quantum of coal reserve in Meghalaya as on 01-04-2017 is 576 Million Tonnes (89 Million Tonnes proved, 17 Million Tonnes Indicated and 471 Million Tonnes Inferred). The quantity of coal produced in the state during the previous 22 years is given below.

(Quantity in Million Tonnes)

SI No.	Year	Production
1	1995-1996	3.248
2	1996-1997	3.241
3	1997-1998	3.234
4	1998-1999	4.238
5	1999-2000	4.060
6	2000-2001	4.065
7	2001-2002	5.149
8	2002-2003	4.406
9	2003-2004	5.439
10	2004-2005	5.345
11	2005-2006	5.566
12	2006-2007	5.787
13	2007-2008	6.541
14	2008-2009	5.489
15	2009-2010	5.767
16	2010-2011	6.974
17	2011-2012	7.206
18	2012-2013	5.640
19	2013-2014	5.732
20	2014-2015	2.524
21	2015-2016	3.712
22	2016-2017	2.308

According to the Mining & Geology Deptt. of the Govt. of Meghalaya, ungraded type of coal is mined from the large number of small coal mines of Jaintia Hills, Garo Hills, Khasi Hills (East & West).

Area Wise Production of Coal in Meghalaya during Last Ten Years

(Quantity in Million Tonnes)

Years	Jaintia Hills	Garo Hills	Khasi Hills	Total
2007-08	4.360	1.370	0.811	6.541
2008-09	2.891	1.004	1.594	5.489
2009-10	3.722	1.562	0.483	5.767
2010-11	4.743	1.940	0.291	6.974
2011-12	4.622	2.108	0.476	7.206
2012-13	2.870	2.380	0.390	5.640
2013-14	2.781	2.519	0.432	5.732
2014-15	1.601	0.395	0.528	2.524
2015-16	1.662	0.701	1.349	3.712
2016-17	0.597	0.279	1.432	2.308

These mines are in unorganised sector (Private non-captive) and are mostly operated by the local tribal in their private lands.

Meghalaya coal is despatched by road as there is no rail link in the state. Coal extracted from this state is primarily despatched to the other North Eastern states and different Northern non-coal-producing states like Haryana, Himachal Pradesh, Punjab, Rajasthan etc. Besides, it is also exported to the neighboring countries, particularly to Bangladesh.

The availability of data on coal from the State of Meghalaya:-

The Directorate of Mineral Resources, Government of Meghalaya, collects production and despatch data on coal. The figures relating to despatch of coal are compiled by the Directorate from the monthly returns furnished by the different check gates. Since there is no other source of production data and small miners are expected to sell off their produce as soon as it is mined, production is assumed to be same as despatch.

Monthly Production /Despatch of Meghalaya coal during 2016-17

(Quantity in Million Tonnes)

Month	Production
April'16	0.444
May'16	0.227
June'16	0
July'16	0
August'16	0
September'16	0
October'16	0.015
